AC adjustable-speed drives with electronic power converters—the early days 3−12558
AC and DC drives, major types, comparison guide and selection tips 3−4445
AC drive, microprocessor based 3−8492
AC drive system, invertor-fed, having high-performance microcomputer based pulse width modulator 3−12557
AC induction motor drive systems improved PWM control strategy 3−12555
AC microprocessor controlled drive from Westinghouse 3−12374
AC motor control, general purpose microprocessor modulator for PWM techniques 3−8270
AC motor variable frequency drives 3−12372
AC servo-drive, brushless, design and expt. results 3−8451
AC/DC, sliding modes application in control system synthesis 3−12549
adaptive single-parameter regulator for unified electric drive packages 3−16505
adaptive single-parameter regulator for unified integrated apparatus in electric drives *(Russian)* 3−16487
adjustable, electronic controllers for railway ballast cleaning and rail welding machines 3−1054
adjustable, microprocessor appls. 3−815
adjustable frequency alternating current variable speed drive systems 3−8272
adjustable speed AC drives, appls. to machine tools and process machines 3−4451
adjustable systems for rubber and plastics industry in Rumania 3−1242
antiparallel four-quadrant thyristor convertors, delay angle retardation type, control problems 3−1043
asynchronous, with thyristorised phase control, automatic speed control system linearisation *(Russian)* 3−16491
automatic electric drive based systems, approx. of mathematical control models *(Russian)* 3−16358
automatic speed control of one-quadrant DC drives 3−12517
battery-powered factory trucks, voltage step control methods 3−1036
bidirectional bridge, nonlinear control system, design and simulation 3−20424
buyer's guide to drives and drive controls 3−20285
cement industry, conf. Vancouver, BC, Canada, May 23-27 (1982) 3−1093
centre wind drives, appl. design methods 3−12382
circulating currrent control by symmetrical components of four quadrant DC drives 3−8190
cold roll mill, four-high, for producing steel strip, automatic control system for electric drives 3−1124
cold roll mill, four-high for producing steel strip, automatic control system 3−1125
conference, Brasov, Rumania, 1982, May 3−1034
considerations in applying induction motors with solid state adjustable frequency controllers 3−1055
constant pull drive design for wrapping conductors with insulation tape *(Czech)* 3−16492
control and regulation arrangement of the inverter control device TDR 100 for robot drives *(German)* 3−4565
controlled rectifer-DC motor drive, algorithm for digital simulation 3−3073
controlling a frequency-regulated asynchronous electric drive 3−1004
controlling of stepping drives with microprocessor systems *(German)* 3−4564
converter fed DC machine, digital and feedforward using microcomputer *(German)* 3−8430
current source invertor drive induction motor systems, field orientation control anal. 3−12550
current source invertor drive induction motors, control anal. for microcomputer control systems 3−8465
current source invertor induction motor drive, sampled data model, slip freq. control 3−8278
current source invertor induction motor drive voltage clamping circuits 3−14961

electric drives continued
current-fed induction motor drive synchronous microprocessor control 3−12547
current-fed invertor drive, with air-gap voltage feedback stability anal. 3−8281
cycloconvertor induction motor drive with instantaneous zero sequence currents 3−12583
DC, controlled current source based on magnetothyristor converter appl. 3−4611
DC, optimal characts. *(German)* 3−12378
DC drive adaptive current control by microcomputer technique *(German)* 3−12482
DC drive digital speed controlling loop transient curve determ. using Z-transformation method *(Slovak)* 3−12491
DC drive motor, digital speed control system anal. 3−20415
DC drive velocity, closed digital control loop by changing sampling period 3−16461

digital polyphase filter banks 3−13287
fixed point arithmetic, error anal. in mixed FFT algorithms with decimation in frequency 3−5392
galactic collisions, numerical simulation techniques 3−6857
Glassman's general N fast Fourier transform, derivation and FORTRAN subroutine 3−13083
hydroelectric power station hydraulic/mechanical aspects computer simulation 3−14947
implementation on TMS 320 family 3−1831
ion cyclotron spectroscopy software 3−2865
molecular fluorescence, cross-correl. analysis for spectra identification 3−22171
motion degraded image, restoration by Kalman filter *(Japanese)* 3−11706
multi-channel microprogrammed FFT processor 3−5092
multi-purpose set of routines for the fast Fourier transform 3−4058
numerical calculation of Fourier coefficients *(Slovak)* 3−5091
numerical stability of algorithms, FFT appl. 3−1563
off-line FFT processor, Intel 8085 CPU appl. 3−20972
Radix-2 FET butterfly processor using distributed arithmetic, parallel-data VLSI architecture 3−13330
RF dispersion characts. determ. in underground power cables, sampling-rate drift problems 3−3076
roundoff and truncation errors due to finite word length 3−17490
short multidimensional convolution computation *(German)* 3−5596
signal processing, FFT procedures 3−20744
SIMD computer appl. to signal processing 3−17495
SPS-1000: a data flow architecture, high-speed FFT processor 3−17397
trigonometric functions, recursive generation, Algorithm 49 3−8974
vector radix FFT error analysis 3−1475
waveform samples, Fourier anal., TI59 program 3−7516

fast-response computer systems
flight simulation problems and special-purpose computer soln. 3−3247
microprogrammable high-speed bit slice image processor 3−9327
programmable systems components for signal processing 3−9330
Ridge Thirty-Two, high-speed 32-bit minicomputer with pipelined processor 3−9500
supercomputers 3−17643
systolic processor for 2×10^8 operations per second 3−9317
GaAs ICs for high-speed computers 3−5222

fastening *see joining processes*

fatigue testing
for corrosion fatigue testing, see corrosion testing
microcomputer-based control device for Shimadzu SERVOPULSER *(Japanese)* 3−12345
spot welded joints, fatigue testing *(Japanese)* 3−12931

fault currents
see also leakage currents; short-circuit currents
forming the control influences during control of power systems under fault conditions *(Russian)* 3−982
power system 3-phase short circuit faults, contribution of induction motors 3−18999
power system automatic time advanced splitting for fault clearance *(Russian)* 3−4550
power system digital back-up protection 3−4589
power system electromagnetic transient anal., network equivalents 3−10723
static VAR system transients, digital simulation 3−994
Swiss grid system short-circuit levels, online evaluation experiences 3−19023
use of automatic time advanced splitting of a network in fault clearing 3−8410
West-Europe interconnected power grid online security oriented control system 3−16588

fault location
Autek 5810A system, PCB assembly checking 3−1356
car engine factory, automatic fault detection system 3−4783
car engine machining, machine fault detector, computer terminal 3−4784
circuit ATE, Marconi in-circuit testing system 80 X *(German)* 3−20643
combinational logic networks, fault detection 3−5318
combinational networks, complete test pattern generation 3−20883
computer-aided testability design fault diagnosis system and adaptive strategy 3−20646
digital circuit ATE, Diagnostic Organization and Retrieval-Algorithm system 3−8807
digital circuits, device for detecting interruptions of control and status lines 3−9110
digital logic testing, Physical Fault Simulation method 3−9182
distribution networks, agricultural, full automation *(Russian)* 3−8398
EHV transmission lines, digital backup protective relaying equipment 3−1031
electronic systems and software, design and specification errors 3−9848
EPROM testing, 16K n-channel devices 3−9414
EPROM testing, theoretical considerations 3−9413
fan out reconvergent circuits, cover investigations 3−6953
Ford Sierra PC systems, EDDI error diagnostic dynamic indicator 3−4404
functional RAM testing, simple and efficient algorithms 3−21021
in-system signature anal., use of E^2PROMs for signature storage 3−17326
large scale plants, fault location method using inverse direction search in digraph *(Japanese)* 3−20118
microcomputer circuits, error tracking *(German)* 3−1801
microcomputer-controlled dead time loop with servicing aids *(German)* 3−4967
microcomputers, 8085-based, fault detect. and isolation technique 3−20960
microprocessor based systems, fault detection and location tools 3−9278
microprocessor systems, electromagnetic compatibility and testing considerations in design 3−13318
microprocessor-based systems techniques 3−1822
microwave cable, automatic fault analyser 3−8800
modularised fault tree, calc. of no. and size of prime implicants for Boolean function 3−7667
multiprocessor system, faulty processor diagnosis using three valued logic 3−5209
multistage interconnection networks, fault diagnosis 3−1603
MV networks failures identification and selection by microprocessor controlled protection system 3−20372
nuclear reactor fault detection and isolation methodology 3−20358
operating system, failure diagnosis and reliability 3−10187
PIO test program for NASCOM, in Z80 machine code 3−18283
power systems, AC/DC, fault and anomaly monitoring and recording by OSCILLOSTORE N and OSCILLOSTORE T 3−12541
power transmission line with current transformer saturation, fault location 3−14949
railways, field test in office communication *(German)* 3−10350
reliability analysis, delay times 3−368
scheme for connecting processors through an open-collector bus with failed processor detect. 3−9494
semi-automatic signature analysis: a stage in the maintenance of digital systems *(French)* 3−17348
semiconductor memories, fault-coverage of pattern-sensitive fault-detection algorithms 3−5512
synchronous sequential circuits, fault diagnosis 3−17218
Telex Diagnostic Computer, alarm and performance monitoring system 3−3170
tracing using signature anal. system *(German)* 3−19077
underground telephone cable fault location system, microprocessor-controlled 3−1393
underground telephone cable fault monitoring system, computerized 3−1392
VICTOR, fast VLSI combinational cct. testability anal. program, FORTRAN 3−22369
VLSI, automatic test generation 3−7026

fault-tolerant computing
aerospace engine controller, self-checking microprocessor-based device 3−16919
August systems series of fault tolerant computers for industrial control 3−13462
automated guideway rapid transit system, on-board real-time control 3−8677
backup circuit, bringing in redundant microprocessor 3−9261
basic fault-tolerant multicomputer system software structure 3−18015
Basic Fault-tolerant multiprocessing System, reliability appl., system load 3−9515
batch process control appl. 3−8511
binary search for indexed sequential files 3−6050
Byzantine generals problem 3−21168
channel check system, single line 3−9496
checkpoint inclusion 3−18297
chemical reactor, programmable control, use of fault tolerant computer 3−8623
CHORUS, distributed coupled actor system 3−9221
CLU exception handling 3−18227

fault-tolerant computing continued
communication networks, fault-tolerance allowing deferred maintenance techniques 3—13657
concurrent file synchronization, method 3—9829
concurrent programming using small shared variables 3—18302
concurrent testing of flow of control in simple microprogrammed control units 3—18049
control system with fault tolerance *(German)* 3—17618
Cooperative Highly Available Multiprocessor network potential for signal processing 3—9335
cooperative processes, lesion tolerance problem 3—18346
data recovery in host networks 3—2232
decentralised system aiming at fault tolerance, autonomous controllability 3—711
design of a fault-tolerant computing element for distributed data processors 3—9225
digital controllers, microprocessor based, fault tolerant features 3—8237
distributed computer architecture for real-time, data driven applications 3—13277
distributed control systems, reliable duplex station 3—865
distributed databases, fault tolerant commitment scheme 3—10250
distributed hierarchical special-architecture microcomputer system, failure tolerance anal. 3—9514
distributed local computer control network for solar cogeneration plant 3—16518
distributed software, structuring for fault-tolerance 3—2213
distributed systems, error confinement and data recovery 3—2091
distributed systems, task- and file-allocation 3—2455
distributed systems availability, auditor 3—2046
distributed systems fault tolerance 3—17824
distributed systems with fault-tolerance, design 3—1955
Donges refinery, automata array *(French)* 3—8624
Dragnet, local network with fault tolerance 3—17779
dual-stream processor operation after failures 3—17633
duplex hybrid system, software implementation of disagreement detector 3—9276
dynamic fault tolerant control systems, microprocessor based, synchronisation 3—8212
error detection and correction, optimal strategy determ. 3—5939
error isolation from error domain list, procedure 3—2233
exception handling in distributed systems 3—2458
fail-safe and self-checking logic systems development *(Chinese)* 3—9163
failsoft design in a multiprocessor computer system 3—9517
fault-tolerant computer system design using GRAMP 3—21105
gas distribution governors, reliable microprocessor-based digital controllers 3—4491
general-purpose computer system based on single-board microcomputers 3—21045
hardware design for fault tolerance 3—17650
hardware redundancy *(German)* 3—13464
HDLC protocol throughput limits 3—9637
hot standby systems for industrial control 3—7080
hypercube connected array of processors, fault tolerant characteristics 3—9227
image processing, fault detection and correction in array computers 3—5446
industrial computer control appl. 3—10873
industrial redundant sequential control, software issues 3—8507
information integrity checking in ROM, resolution of on-line methods 3—9365
input/ouput subsystem for an 8086 based computer 3—9569
interconnection network using error correcting codes 3—1606
interconnection networks, fault tolerance analysis 3—1604
IRAAP, interactive FORTRAN program for fault-tolerant system architecture reliability and availability predictions 3—10110
local area networks, multichannel broadcast architecture 3—5760
logic gates, fault tolerant design 3—5307
management of logical and physical data failures 3—18371
memory testing with chip kill recovery scheme 3—17333
microcomputer large networks, graceful fault tolerance 3—9224
microcomputer networks, process scheduling and deadlock prevention 3—13685
microcomputers in automatic train control, reliability and redundancy 3—15581
military standard bus architectures, distributed computing, fault tolerant 3—9223
modelling and estimation of reliability *(Hungarian)* 3—18000
multi-microcomputer baric fault-tolerant system 3—17649
multicomputer system throughput and reliability problems in real-time sensor data processing 3—9333
multihead Turing machine parallel system, formal model 3—20787
multimicroprocessor operating system modelled with locality Petri nets 3—18345
multiprocessor architecture for real-time fault-tolerant computing 3—9527
multiprocessor fault tolerant computer with processor relief 3—1939
multiprocessor network architectures 3—9226
multiprocessor system, fault tolerant connecting network 3—1605
national electric power distrib. centre, multiprocessor control system *(Hungarian)* 3—16535
need in life critical applications *(French)* 3—17645
Nonstop computing system from Tandem Computers 3—21241
NonStop II, real-time system with Operations and Service Processor (OSP) 3—9486
online computerised control systems, redundancy, reliability improvement 3—15100
operating system, failure diagnosis and reliability 3—10187
organisation of storage intermediate results in computer systems, efficiency 3—21485
PAC, selfchecking control processor 3—13491
partitioned buffer data storage, protection upon power failure 3—1855
performance evaluation of computing system subject to failures 3—21647
predictable system synthesis with allowance for third generation computational devices 3—9022
Project Isabelle, proton accelerator, redundant control systems 3—5005
protocol for distributed system, Petri net specification 3—13679
protocols, distributed commit with bounded waiting 3—2045
real-time system reliability improvement, program fallback strategy and mechanisms 3—10109
reconfigurable architecture, special-purpose units in general-purpose structure 3—5364
reconfigurable parallel pipelines for fault tolerance 3—5363

fault-tolerant computing continued
redundant computer system, operational reliability estimation 3—17598
reliability and maintainability, conf., Toulouse, France (Oct. 1982) 3—11637
reliability evaluation and comparison of fault-tolerant systems 3—1938
reliable parallel data processing, redundant design 3—13342
repair by reconfiguration using replicated chips intended for checking 3—17632
RHEA, communication support system for distributed process control in aggressive environments 3—9661
robust distributed solution to the dining philosophers problem 3—6244
safe information processing system 3—1743
self stabilizing capability of loops 3—2254
self-checking software in distributed systems 3—10111
self-organising control system, multiple microcomputer system, process control appl. 3—8213
self-testing interface for multimicroprocessor systems and local networks 3—5615
sequential circuits with fault-tolerance 3—5253
software faults, causes and reduction of errors *(German)* 3—10101
software implemented fault tolerance, methodology 3—2241
software integrity 3—13886
software reliability, DSI A/S development method, traffic control appls. *(Danish)* 3—8653
software resilience 3—21700
software tolerance 3—9824
software-implemented fault tolerance in flight-control computer systems 3—11002
Space Shuttle, redundant processing system 3—3249
Stratus/32, fault tolerant system with hardware redundancy 3—13463
Synapse Expansion, multiprocessor fault tolerant architecture 3—13262
system-level fault diagnosis in a distributed system 3—17390
systems design requirements for fault-tolerant systems 3—17977
telecommunication switching, fault-tolerance in multiple microprocessor control 3—4944
translation of augmented PASCAL 3—10075
triple modular redundant ring structures for multimicroprocessor systems, synchronisation 3—5604
triplet modular redundant computer system, reliability evaluation 3—1930
Tritium Systems Test Assembly, redundant control system 3—9688

closed loop simulation system 3—3856
closed loop system spectrum control, Krylov and Fadeev methods 3—20234
coffee roasting, programmable controller appl. 3—8641
common controller for a family of plant models, design 3—12045
continuous stirred tank reactor feedforward/feedback control synthesis 3—1233
control of linear time lag systems, using integro-differential eqns. 3—4287
control system synthesis for specified time domain insensitivity to interaction induced plant ignorance 3—16157
control system with integral coordinate-parametric feedback, construction and properties 3—16177
control systems, state space representation, structural pole-zero anal. *(German)* 3—4273
control systems with delayed feedback, chaos 3—16272
current source invertor drive induction motors, control anal. for microcomputer control systems 3—8465
current source invertor induction motor drive, sampled data model, slip freq. control 3—8278
current-fed invertor drive, with air-gap voltage feedback stability anal. 3—8281
D-controllability of linear systems defined by their transfer matrices 3—631
decentralised control, structural properties 3—16223
decentralised controller initialisation problem 3—697
decentralised large scale feedback system, simultaneous achievement of local and global objectives 3—12162
decentralization of a stabilizing multivariable feedback controller *(German)* 3—20190
decoupling of multivariable systems, extensions to $D \neq 0$ and output feedback decoupling 3—679
decoupling via linear state feedback, unifying approach 3—12160
Dirichlet boundary control problems for parabolic eqns. with quadratic cost 3—20174
discrete time digital compensators, architectural issues in implementation 3—720
discrete time systems, minimality of feedback realisations 3—12182
discrete time systems under periodic output feedback, pole placement 3—12198
dissaturation control signals for urban areas, planning 3—20076
distributed parameter system appl., servomechanism appl., design procedure *(Japanese)* 3—738
dynamic output feedback controller synthesis 3—12029

feedback continued
dynamical systems, numerical solution of stiff differential equations, feedback control appl. *(German)* 3−16162
economic information, time lags in transformation and evaluation process *(Czech)* 3−4132
education, computer based control system of concept formation 3−7210
education, concept formation process anal., computer-based control system theory 3−7180
electrical drives, PWM feedback control system 3−1019
electrohydraulic servosystems, feedback for stabilisation *(Rumanian)* 3−4458
electronically track guided motor vehicles, control using Luenberger observers 3−1282
error feedback and internal models on differentiable manifolds 3−12290
exact model matching by proportional output feedback, general algorithm 3−629
exact pole assignment using direct or dynamic output feedback 3−12019
expansion and contraction of linear time-varying systems 3−16262
extremely fast state feedback and observer systems, transfer characts. 3−20120
feedback semigroups and cosine operators for boundary feedback parabolic and hyperbolic equations 3−16271
flight control systems, variable control policies 3−16931
float glass furnace, identification and feedback control 3−20546
forest monitoring and harvesting policies 3−19984
general systems theory, feedback systems 3−3814
gonadotropin secretion, negative steroid homron feedback control 3−8869
graph metric for unstable plants and robustness estimates for feedback stability 3−12153
grinding, automatic control system *(Russian)* 3−16764
gyrostat, feedback-controlled rotor spin, stability 3−12775
Hamiltonian systems, disturbance decoupling by observation feedback 3−20122
high gain and cheap control problems, direct singular perturbation anal. 3−12005
high order linear system, time suboptimal feedback control design through coordinate transformation 3−20153
high order linear systems, time suboptimal feedback control 3−12085
homomorphisms and congruences for abstract feedback systems [multivariable linear control] 3−8134
homotopy-method for eigenvalue assignment using decentralized state feedback 3−12156
hot strip mills, flatness control system 3−1104
hydraulic actuator, drift associated with positioning control, microprocessor-based controller appl. 3−8304
hydraulic ram, indirect feedback position control 3−16444
hyperbolic systems with no dissipative conditions, boundary stabilisation 3−12064
hypertension, public policies, feedback simulation model 3−4241
hysteresis loop, influence of negative feedback *(Hungarian)* 3−12282
induction machine, doubly-fed, synchronous, stabilisation anal. using small perturbation dynamic model 3−1062
industrial robots, algorithm for adaptive control with force feedback *(Russian)* 3−4750
insurance systems, discrete time profit sharing, classical control 3−20015
integral action system, stabilisation using output feedback *(German)* 3−16180
integral control action and separated feedback control 3−12245
interconnected linear systems, optimal scalar Lyapunov functions for decentralised stabilisation 3−4283
interconnected nonlinear systems, decentralised stabilisation 3−4306
interconnected power system, suboptimal load frequency control 3−1022
interconnected systems, fixed modes and local feedbacks 3−12131
interconnected systems, stability anal. 3−8148
interconnected systems stabilizable by decentralized control, using local feeback 3−4310
invariant factors and output feedback 3−12043
inventory and order based production control system, dynamic anal. 3−4174
IPC 300 programmable controller for closed loop feedback control 3−16324
L-integral left inverse system, design method, appl. of theory of invariance *(Japanese)* 3−20248
Laguerre polynomial expansion, space feedback system parameter estimator, linear state space soln. 3−11657
large space structures, sampled data control using constant gain velocity feedback 3−16926

Nash equilibrium in n-person games 3—19724
Nim-type games 3—237
nonautonomous evasion problem 3—15656
noncooperative games, solution 3—7547
noncooperative implementation of collective decision making, survey of results 3—7538
nonexistence of super-additive solutions for 3-person games 3—11505
nonzero sum game with partially nested information structures, Nash solutions 3—3706
online optimization with a team of learning automata 3—8128
optimal interaction of two pursuers in a game problem 3—235
organisational systems, regular functioning mechanisms 3—510
parametric preference orderings in group decision making 3—259
partitioning games, cores 3—7542
pathology causes, study using Pearl's game 3—7709
pattern recognition, appl. to imperfect noncooperative learning and multi-class classification 3—7860
pebble game, asymptotically tight bounds on time-space trade-offs 3—5179
periodicity in optimal control and differential games 3—20172
preference functions and bargaining solutions 3—11523
presidential primaries, optimal resource allocation 3—8075
probabilistic prospects of Stackelberg leader and follower 3—19727
problem solving theory, artificial intelligence aspects 3—7717
production control system operator training, game-theory-based computer system *(Russian)* 3—11195
pursuit problems with simple motion and constraints of different types of controls 3—15657
qualitative diffrential games, solutions 3—752
random-signal recognition system, determ. of parameters in presence of noise *(Russian)* 3—3908
RAS method, game theoretic approach to extended ERAS method 3—7938
region investment allocation model, numerical anal. producing hierarchical control problems 3—556
river pollution monitoring using sequential filter 3—7967
robust filtering and prediction for linear sytems with uncertain dynmamics 3—11779
S-games and differential S-games, soln. algorithm 3—11524
S-games and differential S-games, solutions 3—11518
secretary problems with inspection costs as a game 3—243
sequential assignment game for randomly arriving jobs 3—15986
Silverman type games, odds vs. evens 3—11508
Stackelberg game, inventive bluff and hierarchy 3—254
Stackelberg game, two-person, complete soln. 3—11525
Stackelberg solution of differential games with sample data information 3—255
static Stackelberg games with linear costs and polyhedra constraints, algorithms 3—11529
stochastic differential game under partial observation, suboptimal Nash strategies computation 3—3702
stochastic differential games of pursuit and evasion 3—7552
structural satisfaction in simple games 3—8077
successive pursuit, elementary model 3—7537
sufficient pursuit conditions in the theory of differential games 3—247
symmetric solutions for (n, k) games 3—11509
symmetric solutions for (n,n—2) games with small values of v(n—2) 3—239
total emission control for managing regional water quality, game theoretic decision process 3—881
transportation forecasting appl. 3—4199
two-armed bandit problem, asymptotic properties 3—246
two-noisy-versus-one-silent duel with equal accuracy functions 3—15661
two-person (group) bargaining problem solns. re-evaluated 3—20011
two-person zero-sum games, GAMELPP program for microcomputers 3—233
undecidable determined games 3—11499
universal strategy in a differential game with fixed terminal time 3—19733
value in differential games with terminal cost function 3—11513
veto games, no gap solution 3—238
voting, single-peaked orders on a tree 3—8076
wind modelling in aircraft response study, conflict of interest concept 3—16911
zero-sum Markov games with stopping and impulsive strategies 3—11495

games of skill
see also personal computing
adventure games, Deathmaze, Labyrinth, Asylum, Asylum 2 3—22588
aerial combat game program *(French)* 3—22551
Airlander, flight simulation game for Pets 3—3446
Apple II disk system, games programs 3—7258
Apple Shootdown 3—11105
arcade games review for Apple 3—19383
Atari arcade games from Datasoft, review 3—3421
Atari software reviews 3—22605
Atlantis game in Applesoft BASIC 3—15329
Blackjack, card game program for Apple in BASIC 3—19358
Boggle game program for Apple II, in BASIC *(French)* 3—22552
Boggler, computerised board-game, BASIC programs for VIC, Atari, TRS-80, and TI-99/4A 3—19403
Car Race game program for Atari in BASIC 3—19354
cartridge games review for Vic-20 3—19384

games of skill continued
checkers program in BASIC 3—11147
chess, computer programs and humanization of technology 3—3451
chess and computer, book 3—15430
chess computers, guidelines for selection and purchasing *(German)* 3—5565
Chilotux reaction game for TRS 80 or Video Genie in Z80 code 3—15365
collective bargaining for educators, interactive computer simulation 3—22532
Color Master, pattern guessing game, for handicapped, BASIC VIC program 3—3420
Commodore Pet arcade games, buyers guide 3—19346
Commodore VIC-20, cassette-based games 3—3445
computer, programming, memory saving, in BASIC 3—3411
computer games, future trends 3—3410
computer games, social effects on children 3—49
computer games we'd like to see 3—15388
Concentration game program in Applesoft BASIC 3—22566
cube puzzle simulation program, review 3—19385
dog track game, ZX81 program *(Spanish)* 3—15429
eleven games for the Apple, review 3—15353
Fliptag game program for TRS 80 in BASIC 3—15335
Fortress game program for Apple 3—15332
Froglet, arcade game for the BBC microcomputer 3—22586
game review, Deadline 3—19345
game review, Miner 2049'er 3—19387
High Orbit, disk-based arcade-type game for Apple 3—3422
instructional simulation gaming techniques, validity, reliability and utility criteria 3—20084
JETSET aircraft flight simulator program in BASIC 3—7142
juggler game program in BASIC 3—15375
knight's movement over all squares of $N \times N$ chessboard, BASIC program *(German)* 3—15298
labyrinth, program for soln., in Sharp BASIC *(German)* 3—15297
Laser Barrage, game program in BASIC 3—3417
management simulation game development based on set of descriptive documents 3—20058
management skill development by business games 3—20010
manufacturing dynamics simulation game for student groups with microcomputer 3—14526
Marketplace, telecomputing game in BASIC and machine language, for TRS-80 Model IIIs 3—3361
Master Blaster game program in Applesoft BASIC 3—15331
Mastermind game, algorithm using list data structure 3—15854
mathematics action games for TI, software review 3—19292
MathMan, home multiplication learning game, in BASIC 3—3307
Meteor Storm, space flight game, in BASIC 3—3413
Meteorites, games program, in Sinclair machine language 3—3425
Minotaur, Vic-20 computer game in Basic 3—22608
Munch Man game review 3—15352
Munchkin Attack, Atari game program in BASIC 3—15325
Number Shuffle on the Atari 3—11102
Operation: Sabotage game program in BASIC 3—15323
Othello programs, analysis and implementation 3—7710
Pagoda puzzle program in assembly language 3—11100
PET Monopoly in BASIC 3—11175
problem-solving instructional strategies, use of role-play activities 3—20083
programming and development methods 3—15385
rapid loading system, used for TV games computer 3—3438
Raster Blaster, pinball video game, for Atari computer 3—3423
Red Alert, games program, in Sinclair machine language 3—3425
Ringquest, BASIC adventure game for Apple II and 48k RAM 3—3362
Rubik Cube solution program, in BASIC 3—3414
Scrabble, computer game for Apple micro 3—11178
simulation games, educational appls. 3—3308
Space Fire game for TRS 80 in BASIC 3—15334
Space Invasion for OSI C1P/Superboard 3—11104
Spectrum software review 3—22592
Superchase, maze game program, in BASIC 3—3415
SYM 23 Matches 3—11099
Tag, two-player game program, in BASIC 3—3416
'The Story Game', BASIC program telling and writing stories 3—3419
Thunderbird game program in BASIC 3—15377
time guessing game, in PET BASIC 3—3418
TRS-80 arcade games, four reviews 3—15355
Valley, computer game with possible extensions 3—22587
Valley Bomber, computer game program listing in Basic 3—15360
VIC-20 games cartridges, review 3—3424
VIC/PET GOMOKU 3—11101
video game industry, design and psychological aspects 3—19438
Warlock's Revenge, game review 3—15354
ZX81 computer games 3—22623
ZX Spectrum game cassettes 3—22628
ZX-81 computer 'game of pairs' program *(Spanish)* 3—7307
ZX-81 computer game, Deep Space in Basic 3—22607

gamma-ray applications
see also radiation therapy
tomographic imaging of LMFBR SAREF-program safety-test fuel assembly 3—15194

gamma-ray detection and measurement
see also gamma-ray spectrometers; radioactivity measurement
DATEP, photomultiplier HV regulator 3—8843
VVER fuel elements, automatic γ-activity meas. in CAMAC system *(Czech)* 3—20674
Ge(Li) detector γ-spectra anal., GWENN program 3—22198

gamma-ray lasers
No entries

gamma-ray spectrometers
microcomputer controlled Mossbauer spectrometer 3—17043
microprocessor-based multiscaler for Mossbauer spectroscopy 3—8844
spin spectrometer parallel processor 3—20653

garbage collection (computers) *see storage management and garbage collection*

gas analysis *see chemical analysis*

gas-discharge displays
AC plasma display panel, discharge patterns due to electrode structure computing 3—10808
flyback sustainer, cct. 3—8186
interactive sketching system for plasma display 3—21279

gas-discharge displays continued
- multichannel indicator on the control panel of a physics facility 3—20263
- plasma display panels, low cost, computer terminal and wall hanging TV set appls. 3—9725

gas discharge lamps *see discharge lamps*

gas-discharge tubes
- *see also gas-discharge displays; ion sources; mercury arc rectifiers; thyratrons*
- No entries

gas dynamic lasers *see gasdynamic lasers*

gas lasers
- *see also chemical lasers; gasdynamic lasers; ion lasers*

- VHSIC/VLSI general purpose computer system, high speed signal and data processing 3—17609
- word processing application 3—2514

generator protection *see machine protection*

generators, acoustic *see acoustic generators*

generators, electric *see electric generators*

geodesic lenses *see integrated optics; lenses*

geodesy
- digital cartography system at Defense Mapping agency Aerospace Center, using digital image technology 3—11183
- hydrostatic leveler, based on light reflection, automated design 3—1441
- inertial systems for geodesy using land vehicles *(French)* 3—4879
- least squares collocation, generalised method 3—20689

geodetics *see geodesy*

geography
- database applications, framework 3—10568
- file organisation for geographic information systems based on spatial proximity 3—6023
- Lagos, Nigeria, urban freight transport, spatial pattern, factor anal., graph theory 3—4197

geology
- expert system in underground geology, LITHO *(French)* 3—14888
- Geoshare: the development of a databank of geological records 3—6843
- map digitisation, graphic cell method, FORTRAN program 3—2999
- Mount Tolman, Washington State, porphyry Mo deposit recognition using artificial intelligence program 3—3009

geomagnetism
- digital data interpretation of induced polarisation resistivity and magnetic data 3—22248
- TI-59 pocket calculator magnetic modeling program 3—14886

geometric programming
- linear exchange model equilibrium pricing *(Hungarian)* 3—16009
- optimal resource allocation in network with indeterminte factors 3—19972
- penalty treatment of equality constraints 3—3768
- posynomial programming algorithm in separable form with no constraints 3—19801

geometry
- affine nonlinear control systems, invertibility, geometrical approach 3—4303
- autonomous discrete time nonlinear systems observability, differential geometric approach 3—4331
- computational geometry, stabbing line determination 3—6031
- degenerate Bezier triangles and tetrahedra to subdivide Bezier curves 3—3674
- geometry graphics packages, using ANSI FORTRAN subroutines *(German)* 3—9923
- graphics in CAD, polyhedron intersection and union 3—6086
- manipulator rate-control algorithms, geometrically based 3—12977
- matrix formulations of Bezier technique 3—3675
- monadic set operations for 3-D modelling 3—6039
- polar to rectangular coordinate converting computer design *(Polish)* 3—10847
- polygonal dissimilarity and shape matching 3—7795
- Pythagoras' theorem, program for TI-58C *(German)* 3—2844
- quadrature formulas, effectiveness estimation, concave programming determ., discrete geometry 3—5072
- three-dimensional constructive geometry for CAD 3—18150
- three-dimensional digital images, surface geometry 3—9336
- trajectory problems, geometrically derived difference formulae for numerical integration 3—13051

geophones *see seismometers*

geophysical equipment
- *see also atmospheric measuring apparatus; data loggers; geophysical prospecting; geophysical techniques; meteorological instruments; oceanographic equipment; seismometers*
- hydrostatic leveler, based on light reflection, automated design 3—1441
- inertial systems for geodesy using land vehicles *(French)* 3—4879

industrial robots
16-bit micros for intelligent robots 3—16772
Ada for robot programming 3—8563
adaptive control strategy for computer-based manipulators 3—12706
adaptive control with force feedback, algorithm *(Russian)* 3—4750
adaptive welding robot, control system 3—1183
aerospace engine turbine blades, automated machining at Rolls-Royce 3—16665
animation systems, Animate and Place, appl. to control programs 3—4725
antagonistic actuator for robot control 3—12386
application to refractories production 3—8633
applications, market prospects 3—4713
arc welding robot control unit technological program memory organisation *(Bulgarian)* 3—20476
arc welding robot system with CCD camera, signal filtering techniques 3—8611
arc welding robot with visual sensor, microcomputer controlled 3—8615
arm control, inverse jacobian matrix and servo inputs high speed computation 3—12705
arm kinematics, dynamics and control 3—8622
ARMS, adaptable robot multi-sensor system with computerised signal processing 3—9360
articulated arm, technique for calculating arm positions 3—4697
articulated robot, autonomous contour control *(Japanese)* 3—12675
articulated robot arms with redundancy, analysis and control 3—4772
ASEA industrial robots, description *(Spanish)* 3—12660
ASEA spotwelding robot IRb 90/2 for modernising automobile production 3—16818
assembling robot visual perception algorithms 3—4710
assembly appl. system 3—1194
assembly robots, algorithm for control *(Russian)* 3—4751

industrial robots continued
assembly robots, influence of microelectronics on development and appl. 3—1202
Australian industrial robotics developments 3—16751
Australian robot industry, review 3—8551
automated factory appl. 3—1158
automated production lines, machines and robots *(Russian)* 3—16642
automated visual inspection systems for accurate quality control 3—16734
automatic assembly, appl. 3—8605
automatic assembly appl. 3—890
automatic tool changing and workpiece loading appl. 3—8566
automatic welding with program storage *(German)* 3—1175
automobile body panel welding with 50 robots and CNC *(German)* 3—16744
automobile engines, completion, final assembly and dress up system using small inductively guided vehicles 3—16817
automobile industry, assembly automation *(German)* 3—12685
automobile industry, consideration of introduction and future prospects of industrial robots 3—16819
automobile industry, robot appls. in Volvo 3—20469
automobile manufacturing, Renault product charact. *(Spanish)* 3—8580
automotive industry, future appl. 3—16807
autoplace opto-sense robot vision system, spray painting appl. 3—8617
bin picking robot system 3—892
bin-picking robots, general purpose hands design 3—16735
blow effect on executive mechanism of manipulational robot 3—8567
BMW motor vehicles production assembly and painting *(Norwegian)* 3—1143
buyer's guide to robots and parts handling equipment 3—20329
car body inspection automation appl. 3—16816
car device assembly appl. 3—1200
car inspection for water leaks, using robot with contactless sensor 3—4746
check specifications and experience *(German)* 3—16718
classification and sub-system description 3—1134
clean room robot 3—8569
CNC manipulator, 5-axis, for jet engine blade repair 3—12692
collision-free path planning, algorithm 3—12704
computer aided manufacture, world survey 3—1084
computer controlled magazining system 3—1193
computer vision, relation to image processing 3—9696
computer vision systems, WISARD etc. 3—15859
computer vision techniques for industrial applications and robot control 3—15864
computer-controlled component mounting machine 3—12636
computerised monorail for delivery of panels to robot welders 3—20324
Consight vision system for streamlining robotic parts handling 3—1133
consumer electronics industry changes from computer-aided technologies 3—16679
contact sensor for welding robot 3—1179
control, introduction 3—20505
control systems, developments and applications 3—1154
control techniques up to free programmable control equipment, user guide *(German)* 3—16725
coordinates transformation, real-time algorithmic/tabular solution *(German)* 3—1149
Cyro five axis arc welding robots, modulator construction *(German)* 3—16747
definitions, functions, developments *(German)* 3—12641
desktop robot arms, control using personal computers 3—4744
development, policy anal., economic and social effects 3—3471
development and applications for metalworking 3—4756
development forecasting, technological delivery system approach 3—7334
disc motor with carbon brush control for industrial robots *(German)* 3—8426
discussion 3—1065
distributed digital processing for servomanipulator control 3—15113
Donai factory automation for assembling Renault 9 automobile body *(French)* 3—16779
driverless vehicle navigation and guidance system 3—20462
Dynamco Incorporated's pneumatic, two-axis PR robot, review 3—1153
dynamic system description via Lagrange's method, industrial manipulator appl. 3—17088
dynamical control of industrial robots with elastic and dissipative joints 3—4773
EDM manufacturing cell appl. 3—4732
electrical harness, manufacturing system, computer-controlled, robot appls. 3—16822
electrical heater assembly appl. 3—1197
electrical wiring harness production, factory automation 3—16826
electrohydraulic drives operation analysis, axes positions reciprocal influence *(German)* 3—1148
evolution from pneumatic control equipment 3—1129
explicit robot control language 3—8619
fan boring for potash, automatic control of manipulators *(Russian)* 3—4480
flexible automated assembly equipment, innovation potential of the eighties *(German)* 3—12689
flexible automated assembly equipment, innovation potential of the 80s *(German)* 3—16803
flexible automation appl. *(German)* 3—12688
flexible lines and production isolation *(Italian)* 3—16708
flexible manipulator on moving platform, model development 3—8568
flexible manufacturing system, laser based inspection system 3—4733
flexible manufacturing system in Csepel Machine Tool Co. 3—4800
flexible manufacturing systems, accurate control *(German)* 3—16737
flexible manufacturing systems, review *(Japanese)* 3—16783
flexible manufacturing systems, robotisation role 3—4804
flexible manufacturing systems used in ASEAs manufacturing facilities 3—4811
flexible manufacturing systems using robots *(German)* 3—12659
flexible manufacturing with computer controlled robots under hierarchical control, requirements and benefits 3—4812
flexible mechanical systems dynamics and control, truncation problems 3—4357
flexible turning cells, technological advances 3—4809
flexible unmanned machining and assembly cells, robot appls. 3—4799
force-to-deviation conversion table for robotic gripping 3—12649
Ford Sierra assembly line, use of robots 3—4693
Ford Sierra assembly robots and programmable controllers 3—12651
France, appls. and production of robots *(French)* 3—10

industrial robots continued
  Fujitsu Fanuc Ltd flexible manufacturing system, experience and effect 3—1191
  gantry robots for resistance spot welding *(German)* 3—16746
  German production industry automation for keeping up competitiveness 3—12674
  grasping method, using touch sensing, for randomly oriented objects 3—16672
  gripper, with sensors and grip control *(German)* 3—20511
  gripper mechanisms 3—12666
  gross-motion control for robot arms, improvement 3—4775
  gyroscope, precleaning and assembly robot, microcomputer control, FORTH software 3—16769
  hardware and software *(Italian)* 3—1174
  heat treatment of components, automatic monitoring system using manipulator *(Russian)* 3—12657
  hierarchical decentralized control of industrial robots 3—4776
  high level language digital drive controller, appl. 3—8238
  homogeneous control structure for an adaptive robot-manipulator 3—16703
  human factors in appl. 3—16670

AC drive system, invertor-fed, having high-performance microcomputer based pulse width modulator 3−12557
AC induction motor drive systems improved PWM control strategy 3−12555
AC microprocessor controlled drive from Westinghouse 3−12374
AC motor control, appl. of HV Darlington transistors 3−8453
AC motor control, general purpose microprocessor modulator for PWM techniques 3−8270
asynchronous machine, rectifier invertor, with phase-sequence cancelling for speed control *(German)* 3−8263
autonomous resonant inverter employing parametric stabilisation of the current *(Russian)* 3−16298
chopper circuit simulation for CAD *(Spanish)* 3−6978
control and regulation arrangement of the inverter control device TDR 100 for robot drives *(German)* 3−4565
controlling a frequency-regulated asynchronous electric drive 3−1004
current invertor-fed, stability anal. *(Czech)* 3−14935
current source, commutation process effect on asynchronous machine stray inductance 3−8279
current source invertor drive induction motor systems, field orientation control anal. 3−12550
current source invertor drive induction motors, control anal. for microcomputer control systems 3−8465
current source invertor induction motor drive, sampled data model, slip freq. control 3−8278
current source invertor induction motor drive voltage clamping circuits 3−14961
current-fed induction motor drive synchronous microprocessor control 3−12547
current-fed invertor-driven induction motor control system stability 3−16522
current-source adjustable freq. controller frequency beating, testing and stabilising considerations 3−12347
doubly-fed single-frame cascade induction machine stabilisation, shaft speed and invertor DC feedback schemes 3−12580
dynamic compensation by inductive wattless current invertor *(German)* 3−16299
electric traction vehicles, state-of-the-art of electrical equipment and power supplies, future developments *(German)* 3−4873
frequency controlled half bridge voltage invertor selected harmonics elimination by switching of switch elements *(Czech)* 3−12486
high performance IM drive by coordinate control using a controlled current inverter 3−4584
HVDC system, dynamic digital simulation by piecewise linear system theory 3−6938
hybrid computer simulation of a controlled-current inverter under normal and fault conditions 3−14962
induction machine, invertor fed, control method, dynamic performance characts. *(German)* 3−4571
induction motor, current source invertor driven, with PI controller, stability analysis 3−20378
induction motor, current source invertor type, pseudosynchronisation, digital simulation 3−8282
induction motor drive, current source invertor, HF operation extension, design and control techniques 3−8452
induction motor drive, current source invertor fed, angle controlled, design 3−8449
induction motor drive, invertor-fed, with microprocessor speed control, numerical simulation 3−1035
induction motor driven by current source inverter, microcomputer control appl. 3−1018
induction motor drives, current source invertor-fed, performance improvement 3−16544
induction motor drives, invertor-fed, manufactured in Rumania 3−1042

invertors continued
  induction motor drives, invertor-fed, microprocessor-based PLL speed control, stability and sampling 3−1049
  induction motor drives, invertor-fed, optimum steady-state operation 3−8276
  induction motors, current invertor speed control 3−16352
  invertor fed induction motor, linear load case, nonlinear adaptive current source control 3−20423
  invertor-fed induction motor control by microcomputer system 3−8462
  invertor-fed induction motor systems, simulation by means of cct. anal. computer packages 3−22322
  invertor-fed multiphase synchronous machine with asymmetric air gap 3−8656
  investigation of a switched variable reluctance motor fed by thyristor and transistor invertors 3−8286

circuit board automatic control and sorting device 3−888
circuit cards functional testing *(French)* 3−10778
circuit simulation, DC iteration algorithm for difficult-to-converge VLSI circuits 3−7015
circuit simulation on vector processors 3−7000
circuit time-domain analysis by waveform relaxation method 3−3085
CLOS, schematic entry system 3−7028
CMOS, notation for designing restoring logic ccts. 3−17351
CMOS, technology, modular space processor, appl. to satellite system 3−17270
CMOS, telephone line-card functions, integration in TCM4204 chip 3−17710
CMOS 16K static RAM fabrication using full isolation by porous oxidised Si (FIPOS) technology 3−5518
CMOS 64K static RAM with high resistive load cells 3−9396

large scale integration continued
CMOS 6K gate array using double layer metallisation technology, 16×16 bit parallel multiplier design 3−9102
CMOS 8K 40 ns E^2PROM fabrication 3−9401
CMOS mask ROMs, large capacity, process from development to mass shipment 3−17540
CMOS microprocessors/microcomputers, status and applications of technology 3−5267
CMOS pair-transistor masterslice LSI 3−5254
CMOS RAM 1 K-bit, cosmic ray induced error rate, effect of miniaturisation 3−17552
CMOS single chip digital signal processor, real-time speech analysis appl. 3−20965
CMOS single chip speech synthesizer design, switched-capacitor multiplier appl. 3−21326
CMOS static RAM, 4K and 16K, single event upset probability meas. using ion beams 3−17551
CMOS static RAM, single event upset error by cosmic rays 3−17550
CMOS ultralow power 8K×8-bit static RAM with six-transitor cell 3−9395
CMOS VLSI, electron beam testing of 64K memory, bulk and SO5 8-bit μPs 3−9424
CMOS VLSI latch-up structs. anal. using PATHFINDER program 3−10816
CMOS-on-sapphire 64 bit floating point processor chips 3−9138
CMOS/NMOS SOS 16-bit microprocessor T88000 using LSI technology 3−1671
combinatorial filter, canonical form bit parallel-serial implementation 3−5406
combinatorial logic networks, switching behaviour anal. 3−20791
combined parallel logic array and pipeline arithmetic array for biological cell image anal. 3−1463
computational network descriptive formalism 3−9321
computer architecture adaptation *(Japanese)* 3−5347
computer memories, channel coding appl. 3−21028
computer-to-network interfacing 3−2001
concurrent testing of flow of control in simple microprogrammed control units 3−18049
constants generator for a VLSI microprocessor 3−20851
content addressable parallel array processor, Titanic, VLSI based 3−5603
control schemes for VLSI microprocessors 3−5277
custom LSI/VLSI circuits, top-down design method, using Petri nets 3−22377
custom VLSI PCB dynamic high speed functional testing, implications 3−19105
custom-IC design software 3−19075
data communications controllers in LSI/VLSI 3−5687
data-graphic displays, functions control, VLSI circuit range 3−2124
design, CAD only way 3−14987
design verification for LSI computers 3−5335
design verification program, MOSEXTRACT 3−7012
digital, 1983 technology forecast 3−13180
digital, VLSI, automatic behavioral test generation based on functional tables translated from hardware description language 3−22367
digital IC design using uncommitted logic arrays, student course 3−5234
digital ICs, ATE, high speed functional testing of microprocessor based boards 3−7097
digital LSI Self-Test using Level Sensitive Scan Design and signature analysis 3−20886
digital PCB performance testing, test generation system design 3−19104
digital signal processing devices, microprocessors and LSI, CAD 3−5450
digital VLSI, integrated functional/structural timing for digital simulation 3−22366
discrete exponential public key distribution system, single-chip VLSI implementation 3−15529
distributed/parallel processing, comparison of cube type and data manipulator type networks 3−13677
DP application circuits *(German)* 3−6956
DRAM, sense amplifier testing 3−21023
E^2PROM, 16K, using new array architecture and designed in reliability features 3−9400
EAROM cell, LSI compatible, digital electronic TV tuning appl. 3−17521
EEPROM, 32K, 80 ns access time, fabrication using floating gate electron tunnelling MOS (FETMOS) cell 3−9398
EEPROM, LV alterable, with MONOS structure 3−21002
electron beam automated mask and wafer measuring and inspection system (ZRM 20) 3−8793
engine control system, microprocessor based using custom LSIs 3−16436
EPROM testing, 16K n-channel devices 3−9414
error detection and correction chips, for RAM systems 3−13389
Ethernet controller and serial interface chips *(German)* 3−13554
Ethernet LSI controller, decoder and encoder chips 3−13628
Eurobus interface standard, support LSI 3−13541
exponentiation in finite fields, VLSI parallel/pipeline architecture 3−5366
fabrication, computer-controlled automated line using wafer cassette transportation system 3−8610
fabrication process, FABRICS II statistical simulator 3−7007
Fairchild VLSI circuits digital signal processing application 3−5464
feedback bridging faults among internal, input and output lines, detection 3−5313
FET Si gate technology PROM/ROM memory cell, very high density 3−1881
fifth generation computer systems project, conference, Tokyo, Japan (Oct. 1981) 3−5351
fifth generation computers, algorithms, architecture and technology 3−5359
fifth generation computers, VLSI and distributed processing 3−5358
FIR digital filters, VLSI implementation 3−5408
flip flops and sequential elements, design using bistable, cells 3−1609
FOCUS VLSI CPU, single-chip 32-bit processor, CAD 3−20846
gate-array logic *(Italian)* 3−9091
gigabit logic devices, review 3−1651
hard-disc controller ICs 3−9563
hard-disk interfaces, simplification using VLSI 3−9564
hardware algorithms for a class of problems defined by recurrence relations 3−5195
Hewlett-Packard Interface Loop, CMOS interface IC 3−17727
Hi-CMOSII 8K×8 bit static RAM 3−9394
hierarchical design 3−10824

large scale integration continued
high-performance ICs, design hardware and software tools, case histories at GEC 3−14993
HMOS 8K×8 RAM with self-refresh 3−9405
I^2L *(Czech)* 3−5246
I^2L laterally-diffused base technology, performance and elec. parameters *(Polish)* 3−1637
iACX-96, single-chip VLSI processor, for real-time control 3−9126
IC artwork analysis, hierarchy exploitation 3−6950
ICD, interactive database management for LSI design 3−7031
IEEE-488 bus interface devices 3−17698
IMS2600 dynamic RAM, nibble mode operation for simple interfacing 3−17531
in-circuit testing of ICs *(German)* 3−10768
information service 'Development and application of microelectronics' *(German)* 3−14623
Initialization Functional Unit, digital interface IC for RAM loading 3−2008
integrated voice recognition system, CMOS chip design 3−21327
Intel 2164A, dynamic RAM, use in microprocessor systems with 8203 controller 3−20993
Japanese fifth generation computer project, aims and objectives 3−5600
layout CAD, channel routers using merging techniques 3−3118
layout pattern anal. system, LAS 3−7009
layout verification, PARADISE circuit diagram generating system 3−7010
line printer plotting programs for VLSI 3−10826
linear systems of equations, VLSI algorithms 3−6657
local-area-network controllers using VLSI technology 3−21131
logic and array masterslices, test data spec., screen image rule generation system 3−9193
logic circuit area required in VLSI, lower bounds 3−1602
LSI-power architecture principles and design strategies 3−1677
LSI/VLSI custom chips, automatic delay calculation 3−7003
mask pattern analyser/circuit simulator, PSL 3−7011
Massively Parallel Processor, design of multiprocessor chips 3−1679
master-slice VLSI layout, spatial distribution of wires 3−5224
Micro-Vector Processor architecture and applications 3−9326
microelectronics, developmental trends and effects on automation techniques *(German)* 3−7079
microprocessor characterisation, soft failure detection and correction 3−17292
microprocessor systems development methods *(Hungarian)* 3−15107
microprocessor test generation 3−20644
microprocessor testing, diagnostics and qualification for custom VLSI devices 3−5274
microprogrammed system design, VLSI views 3−5375
Mil-Std-1553B data communications LSI, serial data bus system 3−9561
MIPS microprocessor architecture 3−5369
mixed analogue and digital circuit simulation 3−10785
MNOS advanced memory device for high density byte-erasable 5 V only EEPROMS 3−21017
modelling and testing for IC users, coherent are efficient approach 3−19101
modem, VLSI, digital signal processing and filters 3−9541
modem chip, TI TCM3101, for US and European use 3−13552
MOS 55 ns 64K dynamic RAM using triple diffused MOST 3−21013
MOS and NMOS VLSI circuits, audio frequency digital signal processing application 3−5465
MOS circuits, prediction-relaxation based simulator 3−6997
MOS ICs, topological design, symbolic layout and verification using MULGA system 3−3125
MOS VLSI, inhomogeneous substrate effects 3−9090
MOS VLSI, process-device-circuit CAD system 3−10812
MOS VLSI, transistor oriented logic simulator, LOGMOS 3−5326
MOS VLSI circuits, integration algorithms for timing anal. 3−3112
MOS VLSI logic design methodology, unified switching theory appls. 3−5158
MOS VLSI static RAM, parasitic resistance effects 3−9425
MOS-LSI circuits, appl. of LOBSTER logical simulation to hazard detection 3−5306
MOS/LSI calculator ICs, PU12 tester *(Polish)* 3−1385
MUART IC, Intel 8256, use in multiplexer for microcomputers *(German)* 3−9556
multichip logic modules, inductively-generated switching noise detect. 3−20898
multiplier-accumulator with 16-bit parallel CMOS/SOS structure 3−5252
multiprocessors, closely coupled, VLSI impact 3−9526
multiprocessors, multistage interconnection networks using 4×4 switches, VLSI performance 3−13676
NEAX 61 digital telephone switching system, digital concentration switching using LSI 3−12833
NMOS 16K static RAM with 35 ns access time 3−9397
NMOS 256K dynamic RAM design and fabrication 3−9404
NMOS 32-bit VLSI processor, externally microprogrammable 3−5270
NMOS 64K DRAM, 22000 square mil, Micron Technology 3−17525
NMOS DRAM, failure and annealing behaviour, temp. effects 3−17543
NMOS DRAM, radiation response 3−17542
NMOS static RAM, high density, subthreshold load element 3−21015
NMOS VLSI CAD, design databases 3−19097
NMOS-III VLSI high density integrated circuits in the HP 9000 computer 3−13442
no-binary logic circuits digital data and process control appls. 3−5250
Optical Command and Beamrider missile guidance 3−12774
optimal allocation of computational resources in VLSI 3−9089
optimal PLA folding problem, complexity and heuristics 3−5309
parallel adders for VLSI, improvements from relaxed pinout constraints 3−5393
parallel sorting scheme, VLSI implementation 3−17253
partitioning algorithm, structure optimised procedure *(German)* 3−6973
path delay computation for integrated circuits 3−7022

smoothing data on rectangular grid while using spline functions, fast algorithm 3−13021
stability criterion of Lienard and Chipart 3−13041
stable solutions to systems of linear equations, with tridiagonal matrix coefficients 3−17119
stationary iterative processes, acceleration in multiprocessor computers 3−20713
summation in finite terms, survey of algorithms 3−13030
symbolic solution of linear equations on a linear multiprocessor system *(German)* 3−17365
tridiagonal matrices, iterative algorithm for multiprocessors 3−1523
weak monomorphisms in the category of convex processes 3−11464
linear-beam tubes *see microwave tubes*
linear differential equations
boundary-layer problems, improved numerical soln. using asymptotic approx. 3−8964
feedback theory in the mathematical general systems theory 3−3814
fourth-order linear dynamic systems, Vyshnegradskiy's problem 3−16165
Lambda matrix latent roots, vectors and projectors 3−8132
matrix exponential, integral eval. for numerical solutions of differential equations *(French)* 3−19707
numerical problems in linear systems theory 3−19850
oscillation of second-order linear ODEs with alternating coefficients 3−19701
out of core linear equation solver for small computer 3−20742
parameterised economic systems, local and nonlocal comparative static analysis 3−7989
population modelling, two-lag differential delay eqn. 3−16000
power system dynamic stability analysis using new eigenvalue method 3−14939
second-order, time-variant coeffs., variational formulation existence 3−16259
singular coefficients in linear differential eqns. 3−20728
solution by stepwise representation operator methods *(Russian)* 3−1538
vibrational stabilization of distributed parameter systems 3−16280
linear integrated circuits
analogue MOS ICs in data communication equipment 3−1977
automatic testing, used for digital/linear mixed ICs 3−12926
LSI, production testing using digital signal processing 3−19100
MICs, microcomputer-based modelling and design concept 3−22350
monolithic microsystem for analog synthesis of trigonometric functions and their inverses 3−17311
operational amplifier circuit analysis with manufacturer-specified macromodel parameters 3−3081
remote control of microprocessor-based systems 3−13307
testing, LTS-2400 User Prototype Family Board 3−16988
linear motors
direct drive using linear induction motors for disk file 3−2177
impact machine control systems and thyristor convertors 3−8474
induction, cylindrical, process analysis using finite element method *(Bulgarian)* 3−14941
induction motor with combined lift and traction for magnetically levitated rapid transit systems, dynamic behaviour 3−8478
journey time predictions for linear motor propelled Maglev vehicle 3−18718

linear motors continued

quantised-control, quantised-observation systems, structure 3—12189
quasi-direct adaptive control for nonminimum phase systems 3—16249
quasistationary systems, synthesis of recursion control algorithm with prediction optimisation 3—8125
random parameter linear systems, statistical anal. with perturbation method *(Korean)* 3—8098
random processes, parameter adaptive estimation 3—392
reachable sets and generalized bang-bang principle for linear control systems 3—20171
recursive algorithms for the statistical identification of linear dynamic systems 3—374
recursive identification of the parameters of linear multivariable systems 3—7692
recursive identification using adaptive orthogonalisation *(Japanese)* 3—11665
recursive parameter estimation algorithms, lattice implementation 3—19880
reduction method using Koenig's theorem 3—647
reliability and maintenance, optimal control policies, linear and bilinear models 3—7663
retarded systems, F-controllability and observability 3—12254
Riccati eqn., stability property 3—12067
Riemannian metrics on spaces of stable linear systems, appl. to identification 3—15822
rings of stable rational functions, algebraic properties 3—11606
robust control system design, via optimal, classical and adaptive 3—20224
robust filtering and prediction for linear sytems with uncertain dynmamics, game theory approach 3—11779
robust linear suboptimal regulators with preassigned trajectory sensitivity, design 3—12111
robustness properties of linear quadratic hereditary differential systems 3—16204
robustness synthesis method for linear quadratic system 3—12110
sampled multivariable systems, limiting zeros 3—20180
Schur approach to pole assignment problem 3—628
Schur approach to pole assignment problem 3—640
second-order system, nonlinear compensation using microprocessor 3—16288
self-bounded controlled invariant subspaces: a straightforward approach to constrained controllability 3—654
selftuning cascade control of linear and nonlinear systems 3—12217
sensitivity function reduction through use of the Jordan canonical form 3—15829
sensitivity minimization algorithms with quadratic performances 3—12106
servomechanisms, robust synthesis 3—695
servomechanisms, robust synthesis 3—4319
shift-variant systems class, state variable representation 3—7762
simulation by reducing polynomial input to equivalent initial conditions 3—16144
single input controllability for normal systems 3—12186
single input single output feedback system, optimal robustness 3—8117
single input single output linear discrete time stochastic systems, convergence of recursive identifier *(Japanese)* 3—12244
single input single output sampled data servomechanism problem, robust controls strategy 3—718
single input single output systems, adaptive observer with exponential rate of convergence 3—393
single input systems, structural optimality 3—667
single-input single-output linear systems, minimality test, state-space realisations 3—4275
singular linear dynamic systems control 3—8106
singular value decomposiion and its application to systems control *(Japanese)* 3—4309
SISO systems, structure of balanced and other principal representations 3—16154
skew-prime matrices for linear systems over rings 3—12042
small input controllability, algebraic proof 3—12044
Smith forms over $R[z_1, z_2]$ 3—11452
socioeconomic systems, dynamic models, optimal control appls. 3—8003
stabilisation by memoryless feedback for systems with delay 3—20238
stabilisation by output feedback, geometric approach 3—12057
stability criteria of systems near limiting conditions *(Rumanian)* 3—8107
stability margin of 2-D linear discrete systems 3—7896
stability margins, N-dimensional, computation and variable transformation 3—8150
stability of linear time-varying systems 3—16184
stable model reference adaptive control in the presence of bounded disturbances 3—12206
state space models, identifiability testing 3—19848
state transition matrix assignment, general computing formula *(Chinese)* 3—8091
state variable participation measurement for selective modal analysis 3—8140
state-space cover problems soln. using partial realisation of matrices sequence 3—11605
state-space decompositions for linear singularly perturbed systems 3—16171

linear systems continued
stationary dynamic systems, linearity properties *(Russian)* 3—3795
stationary system with one nonlinear unit, stability condition, fundamental theorem 3—16173
steam power plant, decentralised control and state observation *(German)* 3—20339
stochastic discrete systems, observers for optimal state estimation 3—20229
stochastic distributed parameter systems, partitioned estimation problem *(Japanese)* 3—737
stochastic noise systems, controllability 3—4341
stochastic object in correlated noise conditions, adaptive optimal control 3—12202
stochastic system with unknown disturbance, limiting form of Kalman filter and state estimation *(Japanese)* 3—20230
stochastic systems with multiplicative noise, stabilizing controllers design 3—12240
stochastic time delay systems, minimal order observer 3—20239
stochastically disturbed linear systems, quadratic optimisation, appl. of structured measures *(German)* 3—4276
strictly observable linear systems, module theoretic approach 3—11604
structure and regulation of linear neutral delay differential systems 3—16283
structure of stationary finite observation records of discrete-time stochastic linear systems 3—12248
structured system, robust control of tracking problem with internal stability 3—694
structured uncertainty, performance and robustness anal. 3—12050
suboptimal control with incomplete state feedback 3—4288
switched reluctance motors, speed control, linear anal. 3—8284
synchronous machine, linear feedback controller, design using optimal control theory and root locus method 3—1024
synchronous-induction generator, stabilising controls 3—12591
system structure at infinity 3—11608
systems over rings, output regulation and tracking 3—11607
thyristor controlled DC motor drive, time optimal control 3—1020
time invariant, discrete, finite, frequency response, evaluating algorithm derivation *(Slovak)* 3—12175
time invariant robust controller, design method 3—639
time invariant system with retarded delay, stabilisation *(Japanese)* 3—12269
time invariant systems, order reduction *(German)* 3—8100
time invariant systems, stability of decentralised observers *(German)* 3—12136
time invariant systems with delays, decoupling *(Japanese)* 3—12270
time optimal control, implementable algorithm 3—8122
time optimal control problems with error estimate, numerical solution 3—20160
time vary systems, stabilizing state-feedback design via the moving horizon method 3—20228
time varying cascade connected composite systems, controllability 3—12243
time-invariant system, frequency-domain approach to model-reduction problem 3—630
time-invariant system, nonoptimal control laws, linear quadratic optimisation 3—4298
time-invariant system, Taylor expansion of transfer function of analogue and digital systems 3—635
time-optimal linear control problems, general soln. method 3—20169
topology of the space of linear systems 3—11609
transfer function approach to linear time-varying discrete-time systems 3—12197
transformation systems, identifiability of state space model, book 3—3852
transmission zeros and transfer functions computation 3—12039
two dimensional systems, pole assignment 3—12261
uncertain multiple-input multiple-output feedback systems, improved design 3—12128
variable structure systems, sliding mode anal. for determining zeros 3—12134

switching power supplies, designer's guide 3—759
TLB3101 phase control IC, design and appls. 3—12303
VHSIC, military image processing appl. 3—19114
VHSIC CAD, electronic equipment description and hardware description languages 3—19061
VHSIC design for signal processing data from large mosaic sensors 3—19113
VHSIC design methodology, CAD and testing 3—19060
VHSIC technology, appl. to general purpose computers through management planning 3—17610
VHSIC technology, image signal processing architecture, target detection and classification appl. 3—17470
VHSIC vector arithmetic logic unit, image processing appl. 3—17407
VHSIC/VLSI general purpose computer system, high speed signal and data processing 3—17609
VLSI, CAD, algorithms and chip architectures 3—14994
wafer production, fab automation, digital IC manufacture, IBM 3—8643
GaAs ICs for high-speed computers 3—5222
Si microelectronic memory chips, Si(p,α) and Si(p,^{3}He) total-reaction cross-section meas. 3—17560

Monte Carlo methods
air pollution monitoring system in Kyoto City, optimal sensor allocation 3—7976
assembly language code optimisation, Monte Carlo techniques 3—6187
cluster structure recovery, effect of cluster size, dimensionality and number of clusters 3—15890
diagnostic radiology, validity of Monte Carlo simulation in scatt. radiation studies 3—14838
electron beam archival memory, target design, Monte Carlo simulation 3—17559
ETRIN program package for simulation of electrons in solids *(Russian)* 3—19078
failure rate parameter, point estimation 3—15755
fault-tree evaluation by Monte Carlo simulation, press. vessel protection system unreliability anal. 3—22468
group preference structuring, appl. 3—258
impurity-vacancy dipoles in 2-D lattice, Monte Carlo simulation on aggregation 3—2919
Ising models, computer simulation 3—2896
lipid bilayer struct., computer expt. and scaling theory *(Russian)* 3—6706
liquid metal-vapour interface struct., pseudoatom theory, computer simulation 3—2881
microcomputer applications, integral soln. 3—260
Mission Reliability Math Model, general purpose computer program 3—22286

Monte Carlo methods continued
molecular beams, RKKM unimolecular decomposition, Monte Carlo simulation program 3—2861
molecular ions, H_2^+, dissoc., H^+ velocity distrib. and separation in C foil, computer model 3—22176
multinomial parametric estimation 3—19876
nonstationary queue simulation, method for developing closed functional representations of service and arrival rates 3—11490
outlier detection using robust measures of scale 3—3709
photon from positron annihilation, energy spectrum and spatial distrib., Monte Carlo calc. 3—10602
power system multi-area reliability calc. using combined state decomposition-Monte Carlo methods 3—19021
QCD structure functions with next to leading order effects, HEVOL2 program 3—6669
random array antenna, peak sidelobe study, estimator of linear array *(Korean)* 3—15058
random event simulator with selectable probability characteristics 3—19449
random high-frequency uncorrelated Gaussian signal, detect. in noise background, decision rules 3—11761
simulation, teaching tool 3—3458
slope stability, Monte Carlo simulation methods 3—3002
Space Shuttle Orbiter environment modelling, using direct simulation Monte Carlo technique 3—3245
statistical surface physics, microclusters, interfaces and simple films, computer simulation 3—6695
system reliability, finding lower confidence limits, accuracy of univariate, bivariate and modified double Monte Carlo techniques 3—15770
systolic algorithms for Monte Carlo simulations 3—10629
thermal transient-state of electrical machines with the application of the Exodus method 3—10747
two sample Wilcoxon test, power over Pearson system, comparison with t-test 3—7563
variance reduction: the current state 3—22165
ventilation distribution monitoring, O_2 washin method evaluation, computer simulation 3—6786
^{133}Xe, lung clearance parameter estimate variability 3—2939

multidimensional systems
  2-D exact model matching 3−16268
  Attasi-type two-dimensional systems, constructions of inverse systems *(Japanese)* 3−8176
  automatic electric drive based systems, approx. of mathematical control models *(Russian)* 3−16358
  bounded-type linear input/output maps, algebraic sufficient conditions 3−12272
  classification problems, number of classes determ. 3−3869
  closed loop system spectrum control, Krylov and Faddeev methods 3−20234
  decentralised displacement of eigenvalues in phase space by resolution of system using graph theory *(German)* 3−8177
  discrete control system with high-order extrapolator, compensation for deterministic disturbances 3−20241
  discrete time model reference adaptive systems for plants with restriction of input amplitude *(Japanese)* 3−8152
  distributed parameter system appl., servomechanism appl., design procedure *(Japanese)* 3−738
  distributed parameter systems, optimal control 3−4350
  frequency-domain synthesis, for production line control *(Czech)* 3−20233
  generalized Stefan problem in several space variables 3−19840
  integrated and distributed systems in realisation logic *(Japanese)* 3−16276
  invertibility of linear dynamical systems over commutative rings 3−16153
  IOS—an interactive program package for modelling automatic digital control systems *(Polish)* 3−15110
  K-ary scalator processors of timer type, analogue and hybrid design *(Russian)* 3−1958
  linear discrete systems, design of controller with memory 3−20201
  linear dynamical system with phase constraints, anal. using reduction method 3−20235
  linear finite dimensional systems, reduction by stable precompensation and stable state feedback 3−12255
  linear retarded systems, F-controllability and observability 3−12254
  linear systems, finite dimensional output controllability 3−12036
  linear systems on Hilbert spaces, functional output ϵ-controllability 3−20236
  low-sensitivity observer-compensator design for two-dimensional digital systems 3−386
  minimum complexity principle in control mechanism design under conditions of indeterminacy *(Russian)* 3−4354
  multidimensional minimisation problems and nonlinear transcendental eqns., software package *(Russian)* 3−17123
  multivariable polynomial positivity testing 3−8919
  nonlinear control system, singular control problem study using differential form theory *(Japanese)* 3−12286
  nonlinear multidimensional automatic control systems, synthesis *(Polish)* 3−12135
  nonlinear pulsed automatic system, upper boundary of sectors of characts. of nonlinear components *(Russian)* 3−16226
  on-off control systems, online partial realisations by linear representation systems 3−4369
  one-dimensional logarithmic criterion for assessing multiparametric systems *(Russian)* 3−11754
  operator factorization on partially ordered Hilbert resolution spaces 3−19779
  optimisation problems in partially ordered Hilbert resolution spaces 3−4351
  optimization of stochastic multidimensional functions 3−11585
  relaxed controls in infinite dimensional systems 3−16279
  respiration, chemical control, system theory anal., multidimens. characts. *(German)* 3−16112
  ring structures, multifunctional operation *(Russian)* 3−16275
  three dimensional systems, exact model matching control using state and output feedback 3−8173
  two dimensional linear systems, pole assignment 3−12261
  two dimensional transfer function, state-space realisation form *(Japanese)* 3−20242
  ZPA SIC program package for simulation, identification and synthesis of discrete process control systems *(Slovak)* 3−22418
multimeters
  digital, cct. 3−8221
  EPG 16 multimeter, programming program control unit, appls. *(German)* 3−20633
  European improvements to logic analysers and DMMs 3−17237
  HP 3468A/3478A digital multimeters for HP-IL/HP-IB 3−19084
  industrial measuring instrument verification, using automated systems *(Czech)* 3−4996
  technological trends in analogue and digital instrumentation, computer appls. 3−20626
multiple processor systems *see computer networks*
multiplex transmission *see multiplexing*
multiplexers *see multiplexing equipment*
multiplexing
  see also frequency division multiplexing; time division multiplexing
  A/D convertor for microcomputers, MPC8S for SPU800 system *(Czech)* 3−17317
  dynamic reliability of multiplex control systems 3−7672
  IMS2600 dynamic RAM, nibble mode operation for simple interfacing 3−17531
  input-output system of computer, transmission capacity, queue accumulator influence 3−9559
  microprocessor serial communications using 28030 SCC chip, features 3−17722
  microwave data network link to voice communication system, benefits 3−21184
  multiple-valued logics, Chrestenson spectrum, appl. of property 3−5121
  rotator design 3−20788
multiplexing equipment
  8-channel analogue input 12-bit A/D converter interfaced to PET 3−13542
  asynchronous time-division switching for ISDN nodes *(French)* 3−8718
multiplexing equipment continued
  buffer overflow probabilities 3−1970
  data shifter using successive multiplexer stages 3−17258
  fibre-optic multiplexor, links signal clusters from 16 RS-232-C channels 3−12851
  industrial I/O systems, using series/parallel addressable multiplexers for remote control 3−841
  integrated voice-data multiplexers, priority cutoff flow control scheme 3−5661
  intelligent multiplexers, trends 3−17688
  Memorex X25 multiplexer alternative to SNA 3−13514
  microelectronics fundamentals *(German)* 3−5243
  MUART IC, Intel 8256, use in multiplexer for microcomputers *(German)* 3−9556

floppy disc operating system UNOS for microcomputer system U 880/K 1520 *(German)* 3—18332
floppy disc use and handling in Superbrain CP/M computer *(German)* 3—9880
flow control techniques analysis 3—9645
FORTH, implementation package for expanded Atom 3—6168
FORTH language *(French)* 3—21567
FTP for microcomputers 3—21180
generic operating systems 3—10125
GKS graphics system *(Czech)* 3—6239
Guardian OS, paging algorithm changes 3—18100
guest distributed system process management in PRIMELINK 3—10194
guest layering distributed processing support on local operating systems 3—10201
hierarchical serialization mechanism for precluding data access 3—21691
homogeneous computing systems, batch processing algorithms for complex jobs 3—21679
Honeywell's Distributed System Testbed (DST), hardware and operating system kernel 3—9664
Honeywell network architecture *(Hungarian)* 3—17804
HUB, secure communication executive 3—5776
iAPX 286 protection architecture 3—17362
IBM's SSX/VSE 3—18312
Idris in C language 3—2436
IMS workload characterisation 3—21663
IMS/VS data sharing enhancements, global hash table update delay, sequential processing 3—18326
indirect files under OS-65D 3—18304
industrial robots, software, operating system, program developing and testing 3—5971
instructional simulation system 3—15498
integrated services, ESS Standard Operating System, NEDIX-510F Packet Switching System 3—15062
Intel operating system processors, iAPX 86/30 and 88/30 3—2432
interrupts and CP/M 3—21670
Intersystems DPS-8000 and Coherent 3—14096
invoking interactive commands from within a program 3—2443
job handling in modular computer system 3—21702
K-DOS disk operating system review 3—6216
kernel isolation for the PDP-11/70 3—6252
'KOS-12' cassette tape operating system for the JPR-12 minicomputer *(Czech)* 3—18337
language PLZRTC for microcomputer control software *(German)* 3—18201
load module for the output of return-code messages *(German)* 3—10181
LOAD MULTIPLE instruction, efficient handling 3—10149
location independent references in internetwork environment 3—21235
LOGIM, software interface for user interaction *(Russian)* 3—18305
M/DOS 6502, Apple disc operating system *(French)* 3—10123
measuring simultaneous events in a multiprocessor system 3—10167
memory management systems, knee criterion 3—13913
menu-driven front ends for CP/M, Supervyz and Organizr 3—18278
menus optimized for performance and ease of use 3—18321
message passing operating system for local area networks 3—5796
MFT and MVT executive programs *(Hungarian)* 3—21701
microcomputer business software comparison of CP/M, Unix and Oasis 3—18317
microcomputer operating system trends 3—21688
microcomputer operating systems, functions and characts. *(German)* 3—10134
microcomputer operating systems 3—14086
microcomputers, operating systems, software industry effects 3—11213
microprocessor file server 3—17786
microprogram control for microcomputers *(Japanese)* 3—2450
MicroShell, flexible from New Generation systems *(German)* 3—14087
MIMAS—a network operating system for Strathnet 3—10195
minicomputers, operating system standard 3—14089
monitor, processes interchangeability 3—10182
MOS ES 1021 error messages *(Czech)* 3—6237
MP/M, commands available *(German)* 3—2431
MP/MII, multiuser multiprogramming version of CP/M operating system 3—21667
MS-DOS, comparison with CP/M-86 3—21698
MS-DOS, CP/M-86, comparison *(German)* 3—21668
multi-access system performance, microprocessor-based monitor 3—6209
multi-personal computer system, optimistic concurrency control and recovery 3—10130
Multics security handling system for remote workstations 3—21680
Multidos, TRS-80 disk operating system 3—10129
multilevel secure systems 3—6253
multimicro architecture and its distributed operating system for real time control 3—10902
multimicroprocessors, implementation of modular general-purpose system 3—6206
multiprocessor system programming facilities 3—13880
multiprocessors, approx. analytical model for asynchronous processes 3—2452
multistage queueing systems with finite intermediate storage, throughput optimisation 3—10139
multitask real time operating system core for microcomputers *(German)* 3—9271
Multitasking Executive for quality improvement of microprocessor software *(German)* 3—21686
Multitasking System Program, real-time operating system 3—14104
multiuser DBMS for personal computers, optimistic concurrency control and recovery 3—18366
mutual exclusion algorithms in computer networks, optimality 3—9666
mutual exclusion within both software-and hardware-driven kernel primitives 3—6241
MVS/XA to extend memory addressing capability in IBM3081/383 3—161
N modules parallel system, availability anal. 3—2448
NAXOS: an operating system nucleus for microprocessors 3—10205

- production planning, programming systems *(German)* 3—4167
- production simulation, effects of low yield and high volume 3—16071
- production-location problems 3—16064
- project management 3—2691

operations research continued
q-transmission in simplicial complexes 3—492
quadratic assignment problem, exact and heuristic cutting plane methods 3—7942
quadratic assignment problem 3—15961
quality control systems, formalised models 3—4171
quantity flow graphs—a tool for the automatic generation of decision models *(German)* 3—10295
rail traffic, capacity problems, simulation using computer graphics 3—590
renewal decisions when category life distributions are of phase-type 3—11915
repair limit policies for vehicle replacement 3—16078
replacement warranties, free and pro rata, cost anal. 3—16066
research and development management, control system modelling, dynamic programming, fuzzy sets 3—15974
resource allocation and identification for discrete systems 3—8034
resource distribution problems in mixed scales 3—491
resource sharing, preemptive priority scheme, invariance 3—11839
risk assessment through determ. of rare event probabilities 3—498
risk engineering, basic controlled interval and memory models 3—11823
robotic cell optimisation, systems approach and group technology appl. 3—16668
robustness of analytical models for nonclassical discrete event systems 3—15994
round trip location problem, fast algorithms 3—11938
safety stock planning in variable demand environment 3—8009
school districting problem algorithms 3—595
schools of thought in contempory OR 3—15975
search methods with imprecise estimates 3—3882
secretary problem with unknown number of candidates 3—7939
selection of nonextremal candidates from a random sequence 3—4102
sequential assignment game for randomly arriving jobs 3—15986
sequential manufacturing process, model for locating repair stations 3—558
shift register latch rechaining problem, travelling salesman formulation 3—20879
shipbuilding in US commercial shipyards, production planning 3—16067
simple plant location problems, survey and synthesis 3—11817
simple timetabling problem, extended version 3—16104
single-machine mean weighted tardiness problem anal. of SPT and EDD heuristics by transformation method 3—502
solid waste management model 3—16142
solid waste transfer stations in urban region, approximate procedure for determining number, capacities and locations 3—11990
spatial equilibrium models soln., MINOS/AUGMENTED package role 3—11812
stable marriages by coroutines 3—19966
stochastic facility location models, proposals 3—11804
strategic distribution policy in operational replenishment review 3—565
strategic petroleum reserves, methodological approach 3—550
structured modelling appl. 3—16072
T-region for minimum cost multicommodity flow problem 3—8029
technological development within firms, influence of human factors *(Czech)* 3—4248
three-vessel problem, fixed-space algorithm of linear output complexity 3—19962
time series anal., conf., Dublin, Ireland (March 1982) 3—19750
TIMS/ORSA Bulletin, conf., Detroit, MI, USA (April 1982) 3—19976
traffic assignment problem, geographic decomposition of shortest path problem 3—20066
transport and urban planning, search models and choice set generation 3—16092
transportation policy analysis using continuous distributions 3—16094
transportation problem, initial feasible solution algorithm 3—11936
transportation problem soln. with respect to time criterion, algorithm efficiency 3—19965
transportation problems, efficiency and time-cost-tradeoffs 3—11828
transportation problems, parametric properties 3—16083
transportation problems with aggregated destinations when demands are uncertain 3—16082
travel behaviour, applicability of disaggregate models, methodology 3—16089
travel demand, disaggregate demand models, promises and prospects 3—16087
travel demand, multinomial probit model estimation 3—16095
travel demand, probabilistic choice models, specification tests 3—16091
travel demand and response analysis, integrating themes 3—16088
travel demand modelling, statistical aspects 3—16090
travelling purchaser problem, approximate algorithms 3—11809
travelling salesman problem, appl. of evolutionary program 3—7952
travelling salesman problem, unique optimal soln., complexity, completeness 3—9068
travelling salesman problem heuristics, optimum assignment 3—11822
truck fleet size planning in presence of common-carrier option 3—20064
two dimensional bin packing algorithms 3—7930
two stage location problems, approximate method *(Czech)* 3—4100
two-facility Weber problems, coincident optima 3—19980
two-layer network, minimum flow cost, two-sided estimates 3—4098
two-level location-routing problems, heuristic methods 3—15968
two-state quality control under Markovian deterioration 3—11913
two-terminal transportation network, Braess' paradox 3—20065
urban systems analysis and urban policy 3—20119
urn problem, optimal stopping based on success runs 3—19960
Value Added Tax control methods 3—4140
vehicle allocation in product shipping, near-optimal soln. 3—8047
vehicle dispatching problem, appl. of extension to Clarke and Wright method 3—20068
vehicle fleet, optimal composition determination 3—11944
vehicle routeing problem, stochastic, survey 3—8050
warehouse distribution system cost minimisation model 3—4173
warehouse layouts eval. 3—20039
water resources development, variables and constraints aggregation procedure 3—15999
wave energy devices assessment, OR models appls. 3—16006
weighted networks, most vital links or nodes 3—4097
work trip model choice models, prediction errors 3—16093
worker satisfaction and job attitudes in repetitive production task, effects of production feedback and standards 3—4161

operator training *see training*

linear continuous Chebyshev problem, appl. of method of feasible directions *(German)* 3—17107
linear distributed parameter systems, optimal smoothing 3—20240
linear dynamic systems with time varying parameters, anal. of robust identification methods based on stochastic approximation *(Slovenian)* 3—4326
linear facilities location in the plane, computational complexity 3—11808
linear multivariable feedback systems, design procedure 3—685
linear perturbed systems, regulation of optimal multivariable tracking *(French)* 3—20132
linear quadratic optimal control, positive controllers 3—4289
linear quadratic optimal control, solution *(German)* 3—664
linear quadratic systems with delay, suboptimal output feedback 3—12095
linear recursion, space-time tradeoffs 3—20805
linear systems, decentralised stabilisation and minimum norm optimisation 3—698
linear systems, synthesis of recursion control algorithm with prediction optimisation 3—8125
linear time invariant systems, adaptive control and optimal input design 3—8163
linear time-invariant system, nonoptimal control laws, linear quadratic optimisation 3—4298
Lipschitz constant associated with Lemke's closest-point principle 3—3785
lot size model with backlogging when the amount received is uncertain 3—4178
loudspeaker crossover network, CAD by optimisation method *(Japanese)* 3—3114
LQB compensator, pipelining 3—720
lumped-distributed networks, freq. domain direct efficient anal. and optimization 3—3134
$M/E_k/1{:}\infty$(FC FS) queueing model, optimal and analytical results 3—226
machine tools, hierarchical systems, optimisation and adaptive control 3—6554
machining, process optimisation, design methods *(German)* 3—4715
manufacturing plant shops, penalty allocation and computation of N-core using coverings 3—16039
Marquardt's compromise, modification, rationale and appl. 3—22158
max separable problems, solution 3—11815
maximum likelihood estimation appl. 3—3842
McDonnell-Douglas F-4C aircraft, robust fixed gain controller design 3—16905
metalliferous ores, chemical processing, parameter identification for adaptive optimisation 3—16660
microfiche funding optimisation for research information support *(German)* 3—10513
military ATE development, systems engineering approach 3—12942
morphological image identification algorithms, optimisation *(Russian)* 3—10833
MOS model parameters extraction 3—6946
motor vehicles, optimum replacement time determ. *(German, French)* 3—15992
moving flight simulator design, optimal control approach 3—16906
moving window approach to generation expansion optimization 3—19012
multi machine scheduling problems, nearly optimum solution *(Hungarian)* 3—11924
multi-machine power systems, stabiliser tuning problem, soln. 3—16528
multicommodity flows, projected Newton methods and optimisation 3—11835
multicommodity network flows with probabilistic losses 3—4105
multicomponent activation detectors, optimisation program in FORTRAN 3—18852
multicriteria, chemical process pathology configurations 3—7612
multicriterial, problems and soln. methods, survey 3—19818
multidimensional distributed parameter systems, optimal control 3—4350
multidimensional systems, optimisation problems in partially ordered Hilbert resolution spaces 3—4351
multidisc variable reluctance motor, performance optimisation, finite element variational method 3—8289
multifacility location problems involving Euclidean distances 3—496
multilevel optimisation of computing system models *(Russian)* 3—19178
multiobjective adaptive routeing in large communication networks, hierarchical scheme 3—12802
multiobjective trajectory optimisation and model semiregularisation 3—669
multioperator service of production line, exact optimal cyclic scheduling algorithm 3—8008
multiperson decision-making, concepts and methods 3—8033
multiple-item inventory model with a job completion criterion 3—16060
multiple-size operators and optimal curve finding 3—7819
multiprocessor systems, frontal optimisation algorithms 3—5208
multisectored economy, investig. of nonlinear optimisation models of growth 3—519
multistage queueing systems with finite intermediate storage, throughput optimisation 3—10139
multistep process optimisation by approximating-combinatorial methods 3—20150
multivariable control system design using DELIGHT.MIMO 3—12120
multivariable functions, optimal quadratures, construction 3—15708
muscle motor element mobilisation control by energy expenditure optimisation *(French)* 3—10637
n-job, 2-machine flow shop scheduling problem with arbitrary time lags and job transportation times 3—8019
Nash equilibrium in n-person games 3—19724
near optimal policies for large scale Markovian decision processes 3—11834
network minimum cuts appl. 3—15721
network scheduling problem, algorithm to speed up search for solns. 3—7929
network with weight constraints and lower bounds of flow quantity for multiple sources and sinks, optimal synthesis *(Japanese)* 3—19977
nonlinear dynamic lung models, appl. of sensitivity anal. and experimental design techniques 3—4217
nonlinear functional, global extremum determ. 3—3760
nonlinear simultaneous equation solution program 3—18949
nonoverlapping triangle net optimisation 3—303

optimisation continued
nonsmooth convex functions, second order directional derivative approx. 3—11581
nonzero sum game with partially nested information structures, Nash solutions 3—3706
numerical modelling of electric fields, optimal discretisation *(Polish)* 3—5111
oil extraction, repair service control using automated system *(Russian)* 3—15230
oil price effect on optimal speed of ships 3—8038
oil production optimal rate determ., for OPEC-member countries 3—4120
one dimensional magnetic systems, spin dynamics, optimisation on CRAY computer 3—6666
online optimization with a team of learning automata 3—8128
open loops systems, model reduction techniques 3—16169
operator training processes optimisation 3—19457
optical data writing on heterogeneous medium with mag. storage by melting 3—13417
optical lens system CAD 3—6693
optimal adaptive smoothing in correlated noise conditions 3—15926
optimal algorithms theory and estimation with unknown but bounded errors 3—13165
optimal and near optimal price and advertising strategies for finite and infinite horizons 3—16026
optimal control design using periodic solutions 3—20144
optimal control models, in manpower planning 3—8032
optimal control of discrete systems, involving delays 3—12090
optimal control with constrained binary sequences 3—20177
optimal finite-dimensional solution for a class of nonlinear observation problems 3—4032
optimal inputs for estimation of parameters of RLC cct., tutorial approach 3—15827
optimal L_2-approximation with fixed poles 3—20121
optimal output inventory decisions in stochastic markets 3—8017
optimal PLA folding problem, complexity and heuristics 3—5309
optimal portfolio choice, selection and ordering 3—11870
optimal replacement under minimal repair, general failure model 3—19852
optimal servicing disciplines for a nonhomogeneous flow of orders in a single-channel system of mixed type 3—19717
optimal size selection in standardisation 3—569
optimal value functions 3—19820
optimisation of ferroresonant voltage stabilisers using physical models in planned experiments *(Russian)* 3—16515
optimum bid estimation on fixed cost contracts 3—4252
optimum repair limit policies with a time constraint 3—11621
organisational performance measurement, decision-aiding methodology 3—15973
organisational systems, regular functioning mechanisms 3—510
output error model reduction; efficient algorithm 3—16234
packing edges and hypomatchable subgraphs in graph 3—3739
parallel execution of loops, parallelepiped method 3—17231
parameter optimisation in linear systems 3—8108
parametric network, maximum flow *(Czech)* 3—4099
partially observed jump Markov processes, optimality conditions 3—12109
partitioned quasi-Newton updates, local convergence anal. 3—8936
partitioning problem with additive objective, appl. to optimal inventory groupings 3—581
path problems, algebraic complexity 3—277
pattern classification criterion 3—7851
pattern recognition, consistent labelling as global extremum 3—7786
pattern recognition, paraboloid discriminant function, optimisation criterion 3—7839
periodic optimisation problems in dynamical systems 3—16292
periodic replacement with increasing minimal repair costs at failure 3—15778
Petri net approach to the evaluation of maximum compatible classes in data path optimization of modern computers 3—21141
piecewise linear homotropy algorithms 3—323
planning horizon theorem and optimal ordering policies *(Japanese)* 3—20047
plotter pen movement optimisation, approx. soln. 3—19833
polygon decomposition problems, NP-hard 3—20800
positively invariant cones, asymptotic stability 3—11567
post transport, optimising multistep control by developing a distributed transport network *(Russian)* 3—591
power cable and thermal backfill configuration 3—10726
power generation, predictive economic dispatch 3—4647
power system CAD, WASP III program *(Slovak)* 3—22300
power system dynamic behaviour optimisation by emergency command of generator excitation 3—16595
power system output control simulation *(German)* 3—16497
power system planning models execution time estimation for optimised economic operation 3—19022
power systems, state estimation and unobservable networks 3—15800
power transmission system anal. using quadratic forms 3—16580
power unit operation, optimisation according to reliability problem 3—8441
precompensators, feedback representation 3—12056
prelimit distribution functions, limit polynomials, in Chebyshev extremal problem 3—3819
presidential primaries, optimal resource allocation 3—8075
price-advertising model, saddle point anal. 3—16010
problem orientation of computer systems through associative learning 3—1630
production, optimal control, for identical prod. lines with minimum rates 3—12597
production control, optimisation *(Japanese)* 3—12629
production lot sizing under a learning effect 3—11893
production scheduling, program system for optimisation *(Czech)* 3—10466
production-location problems 3—16064
program vectorisation packages, performance evaluation 3—2257
proper and improper efficient solutions of optimal problems with multicriteria 3—3770
pulp mill, computerised prod. scheduling, hierarchical optimisation algorithm appl. 3—4839
pursuers in game problem, optimal interaction 3—235
PWM invertor feeding an induction motor, digitally controlled 3—8464
PWR power plant, optimal temperature controller design 3—944
quadratic assignment problem, exact and heuristic cutting plane methods 3—7942

optimisation continued

  dynamic system with delay, using characteristic function *(Czech)* 3−12251
  dynamical system modelling, system identification problem 3−3848
  economic time series models, specification using Akaike's criterion 3−4127
  EMG parameter identification for nerve stimulation control, paraplegic walking functions 3−12969
  environmental systems' behaviour, model identification 3−11842
  enzyme kinetic model for microbial growth processes, anal. and state estimation 3−1264
  experimental extruder, control improvements by discrete formulation 3−4778
  exponential convergence of recursive least squares with exponential forgetting factor 3−15815
  exponential tandem queues, with blocking, approximate anal. 3−7529
  exponentially distributed random variables, maximum likelihood parameter estimation 3−15785
  extended Luenberger observer for identification observation 3−7677
  failure distributions, max. likelihood estimation of parameters 3−19869
  failure flow parameter estimation 3−11611
  failure rate parameter, point estimation 3−15755
  feedforward nonlinear system, identification using complex codes and sum codes *(Chinese)* 3−15781
  fermentation process, state and parameter estimation expts. 3−1267
  fermented sausage production, modelling and process control 3−1265

parameter estimation continued
filtering problem, parameter and state estimates, sufficient conditions for optimality 3−19948
finite Markov chains, learning control 3−274
fish behaviour in relation to fishing, modelling 3−7974
Fisher discriminant analysis and factor analysis 3−15896
fisheries, search effort and catch rates, renewal model 3−7966
fitting biological equations to data using least-squares and non-parametric methods 3−601
fly-by-wire self-tuning control system appl. to aircraft lateral dynamics 3−4925
forging processes, friction factor and flow stress estimation 3−4685
freeway incident detection systems, discrete dynamic models 3−12743
generalised log gamma distrib, max. likelihood estimation, FORTRAN program 3−14719
global convergence of output error recursions in coloured noise 3−12207
globally stable adaptive predictive control in presence of bounded noises and disturbances 3−12235
Hammerstein model, identification using complex codes and sum codes *(Chinese)* 3−15781
Hammerstein model, simulation of recurrent estimation algorithms *(Russian)* 3−3797
hereditary system identification, reduced approx. scheme 3−19896
heteroscedastic linear models, robust estimation when there are many parameters 3−11658
hierarchical optimisation and control, survey of developments, comparison of old and new techniques 3−701
human renal and artificial kidney systems models, validation, methodological aspects 3−4231
hybrid experimental design 3−19741
identifiability of nonlinear dynamical systems 3−15824
identification computer software package 3−7686
identification of linear multivariable systems, canonical model structure determ. 3−7679
identification of multivariable continuous-time systems from samples of input-output data 3−15828
identification with interruptions as an anti-bursting device 3−387
industrial control system, parameter identification using auxiliary variables method *(German)* 3−20440
industrial forecasting systems, appl. of adaptive multiple exponential smoothing model 3−4185
industrial regulators, structurally constrained, initialisation problem in parameter optimisation 3−4315
industrial reliability studies, survival anal. 3−11616
industrial robot hierarchical decentralised control 3−4776
inertial platform motion, optimal selection of trajectories for parameter estimation in dynamical systems 3−16923
inhomogeneous Poisson processes, multidimensional estimation of intensity function 3−3844
input modelling, estimation using event count data 3−15813
invariant parameter in linear estimation and control 3−15832
iterative image partitioning procedure for domain identification. I. Conceptual justifications 3−11719
Laguerre polynomial expansion, space feedback system parameter estimator, linear state space soln. 3−11657
large scale systems, decomposed estimation algorithm development 3−19881
large systems, technical state checking 3−3846
least favorable distributions in single-parameter parameter estimation problems *(German)* 3−390
least mean square adaptive parameter estimation, convergence distribution 3−11654
least squares estimation, persistence of excitation 3−11655
least squares identification algorithm, decomposition on the basis of two stage experiment 3−11664
least-squares, numerical methods 3−3840
left ventricular assist, adaptive control system design 3−8884
left ventricular overload, simple models, assessment of a parametric identification procedure 3−11970
leukemia, simulation and prediction of clinical state using autoregression model 3−20110
life testing, mixed Weibull parameter estimation 3−15752
linear difference equation, matrix of coefficients, estimation 3−19839
linear difference operators, parameter identification, stochastic eqns. soln. estimates 3−5049
linear discrete, combined methods for model reduction via discrete Laguerre polynomials 3−20205
linear discrete time systems, rapid parameter estimation algorithms using the ELS principle 3−12173
linear discrete time-invariant processes, linear optimal estimation 3−4330
linear dynamic discrete time system, stochastic input sequence design for system identification 3−12179
linear lead absolute value problems, dual linear programming algorithms 3−3843
linear multiinput systems, feedback gain determination, by considering transient characteristics *(Japanese)* 3−12138
linear stochastic distributed parameter systems, partitioned estimation problem *(Japanese)* 3−737
linear stochastic object in correlated noise conditions, adaptive optimal control 3−12202
linear systems, identification and adaptive estimation for systems with interrupted observations 3−12170
linear systems, synthesis of recursion control algorithm with prediction optimisation 3−8125
linearly or log linearly constrained multinomial cell probabilities, Bayes type estimators 3−3715
LWR, operation and data anal. with Kalman filters *(German)* 3−20352
manipulator adaptive control strategy based on perturbation eqns. 3−12706
manipulator appl. of self-tuning pole-placement regulator 3−12707
marketing, linear learning models, development and appl. 3−16025
Markov random field texture models 3−15889
Markov renewal model in presence of unknown parameter, average optimal adaptive control 3−15663
Marquardt's compromise, modification, rationale and appl. 3−22158
maximum a posteriori parameter estimation in large scale systems 3−394
maximum likelihood estimation 3−3842
maximum likelihood estimation of three-parameter extreme-value distribution 3−15791
Maypole Hoop/Column antenna surface static models 3−8738

parameter estimation continued
measurement, optimal strategy, for linear estimation case, dynamic programming determ. 3−3836
mechanical respiratory system, computerised nonlinear regression anal. 3−4240
metalliferous ores, chemical processing, parameter identification for adaptive optimisation 3−16660
microbiological synthesis processes, dynamic characts. identification by control computer 3−1457
MIMO systems, implicit adaptive control 3−12209
min-max. determ. of model parameters with uncertainty, industry allocation model appl. 3−587
minimax control and estimation in dynamic systems 3−16200
minimum variance unbiased estimators for population mean and variance 3−3713
mixed linear models, model estimators 3−19875
model reference adaptive control systems, Monopoli's error augmentation scheme 3−12215
modeling and simulation of nonlinear and adaptive observers 3−19887
monotone empirical Bayes estimator and test for the one-parameter continuous exponential family based on spacings 3−15799
moth population, food limited, stability, spatial effects, parameter identification, chaos 3−11845
motorways, method for measuring quality of circulation 3−8046
moving objects parameters estimation, television methods 3−15915
multi-output systems, adaptive observer 3−684
multi-sweep method for the maximum likelihood identification of many parameters 3−16915
multinomial parametric estimation 3−19876
multiparameter estimator in discrete exponential families, truncation 3−19877
multiple ARMA sources, estimation of time difference of arrivals by pole decomposition method 3−15816
multivariable moving average models, uniqueness of prediction error estimates 3−11644
multivariable stochastic systems, approximate realisation based on Page matrix 3−12122
multivariate stochastic processes, state space representation, optimum structures determ. 3−11649
national econometric models, linear optimal control approach 3−4135
new product growth models, Bass and Weibull, for consumer durables, comparative anal. 3−520
noise variances estimation by using multiple observers, ring laser gyro appl. 3−382
nonhomogeneous standby with renewal 3−3822
nonlinear dynamic lung models, appl. of sensitivity anal. and experimental design techniques 3−4217
nonlinear feedback controllers, for nonlinear systems, optimal parameter determ. strategy 3−4364
nonlinear large-scale systems, anal. and synthesis, approx. approach to input-output behaviour 3−751
nonlinear partial differential equations appl. 3−12093
nonMarkovian stochastic process, estimation problem appl. 3−19734
nonparametric validation of parametric models 3−7675
nonsearching self adjusting systems, plant parameter identifier 3−12203
Norwegian power pool, load prediction program system 3−1021
notch filter, stochastic Gauss-Newton method 3−15834
observability anal. and identification 3−4361
on-line methods for rotorcraft aeroelastic mode identification 3−16927
one dimensional heat conduction system parameter identification method *(Japanese)* 3−3849
optimal algorithms theory and estimation with unknown but bounded errors 3−13165
optimal inputs for estimation of parameters of RLC cct., tutorial approach 3−15827
optimal multicompartmental sampling designs 3−20099
output error methods appl. 3−11653
parallel and series-parallel identifiers with weakly observable parasitics, reduced order performance 3−12171
passive oscillatory system, identification procedure for mass, spring constant and damping coefficients determination 3−11661
pattern recognition, appl. of estimation of functionals of probability density 3−11733
pattern recognition, estimation of fuzzy membership of functions 3−7789
pesticides, destruction in soil, self organising model 3−7969
pharmacokinetic models, statistical moments transformation, comparison of rate parameter and mean residence time estimates 3−20100
phosphate drying process, self-tuning control 3−8626
pilot model parameter identification procedure 3−8699
Poisson flow, detection and estimation of instant of change of intensity 3−15741
Poisson processes, marginal distribution estimators for gamma prior parameters 3−15773
Poisson-failure model and gamma prior, graphical representation of Bayesian approach to parameter estimation 3−11638
pole identification for linear systems from multivariable observations 3−12016
position of objects from flat projections, parameter determ., Krestenson transforms appl. 3−3904
power systems, short term load forecasting, recursive estimation technique appl. 3−16574
prediction, reference parameter selection 3−15797
probabilistic characts. estimation from results of trials and modelling 3−378
process restoration from discrete measurements using piecewise smoothing 3−15796
product development, early life cycle cost trade study by parametric analysis 3−3093
production function with positive and negative marginal risks, estimation using time series and cross section data 3−4094
production functions, criteria 3−20016
proportion estimators, bias and variance 3−15783
quasi-direct adaptive control for nonminimum phase systems 3−16249
quasigradient method for identification of physical parameters using linear integral equations of the first kind 3−15795
random data processing, regression and correlation *(Japanese)* 3−11765
random processes, parameter adaptive estimation 3−392
reconstruction of undersampled data in the frequency domain 3−7701
recursion algorithm for discrete l_1 linear estimation 3−7702
recursive Bayesian estimation aspects 3−391
recursive contextual classification using spatial stochastic model 3−11701

parameter estimation continued
recursive identification of the parameters of linear multivariable systems 3—7692
recursive identifier, without initial condition estimates 3—3850
recursive lattice algorithms with finite-duration windows 3—4064
recursive parameter estimation algorithms, lattice implementation 3—19880
regenerative simulation, multivariate estimation 3—3835
regression estimators, comparisons under generalised mean square error criterion 3—3831
regression models for prediction and control of processes of unknown structure 3—15837
respiratory mechanical parameter estimation during mechanical ventilation 3—16137

Forth screen editor for H19 3—3366
Fortress game program for Apple 3—15332
French computer industry developments *(Norwegian)* 3—7342
friendly input programs, BASIC listing for VIC-20 3—19432
Frogger, arcade game for Atari 400/800 software review 3—19404
Froglet, arcade game for the BBC microcomputer 3—22586
Full-Byte, machine code for program control of eighth bit, for Apple printer 3—21666
function display in BASIC 3—19370
function plotting programs for T159/PC100 in machine code *(German)* 3—2300
future developments for home computers 3—22589
game background technique in machine code 3—19377
game machine review, Vectrex Arcade System 3—11112
game of Rat and Dragon 3—7250
game review, Asylum 3—15308
game review, Blockade 3—15317
game review, Cavern Quest for TRS-80 3—11123
game review, Charge 3—11114
game review, Cosmic Conquest 3—11115
game review, Deadline 3—19345
game review, Deadstick Landing 3—15312
game review, Fireman 3—15309
game review, Galaxy Invasion Plus 3—15310
game review, Hopper 3—15302
game review, Miner 2049'er 3—19387
game review, Munch Man 3—15352
game review, Ping Pong and Hockey 3—15307
game review, Puzzle Jungle for the TRS-80 3—11125
game review, Sabotage for the Apple 3—11130
game review, Saucer Formation 3—15313
game review, Sea Dragon 3—15311
game review, Sub Hunt 3—15319
game review, The Millionaire 3—15306
game review, Tunein for TRS-80 3—11124
game review, Warlock's Revenge 3—15354
game reviews, Choplifter, Track Attack and Star Blazer 3—15318
game reviews, Nautilus and Shamus 3—15315
game reviews, Raster Blaster, Preppie, Shooting Arcade, and Clowns and Balloons 3—15314
games, future trends 3—3410
games, social effects on children 3—49
games, software reviews 3—3394

personal computing continued
games controllers, market survey 3—15393
games design techniques 3—11113
games for Atari and Mattel systems 3—11111
games graphics, Superfont using ANTIC on Atari 3—15400
games played using computers 3—22582
games programming, memory saving, in BASIC 3—3411
games programming, positive approach 3—15300
games programs, how the professionals write them 3—15385
games programs for VIC-20, from Nufekop, software review 3—15394
games we'd like to see 3—15388
Garage Sale Records program for TRS 80 in BASIC 3—19351
General Ledger accounting package, disk-based, for Apple II Plus 3—14395
GETFILE CP/M file loading utility 3—3380
golf, HiRes simulation game for Apple II 3—15344
GraForth graphics language 3—10022
Graphic Writer TRSA-80 graphics utility in BASIC 3—3374
graphics, three-dimens. manipulation, BASIC program for Atari 800/400 3—3443
Graphics Magician software review for Apple II 3—7248
graphics on the BBC microcomputer 3—22611
graphics symbol generation program, in expanded VIC BASIC 3—15401
graphics tablets for the home computer 3—22591
Gutenberg word processor for Apple, software review 3—6382
hand-held computer HHC programming language SNAP *(Japanese)* 3—9506
hand-held computers, technical survey *(German)* 3—17603
handwritten character recognition, online, for personal computer system 3—2325
hardware, software, appls. and proliferation 3—11179
hashing routines for Apple in BASIC 3—3346
health awareness educational program in BASIC 3—3297
Heath/Zenith-89 split screen scrolling in BASIC 3—19398
Hewlett-Packard HP86, personal micro, evaluation bench-test 3—19677
Hewlett-Packard HP 82184A plotter module, for programmable calculator graphics 3—15423
Hewlett-Packard HP-87×M personal computer review *(German)* 3—5580
HEX-BCD conversion program for Commodore computers in machine code *(German)* 3—6036
hi-res plotting with the VIC, BASIC subroutine 3—22553
hidden maze game program in BASIC 3—11167
High Orbit, disk-based arcade-type game for Apple 3—3422
high resolution graphics, BASIC programs for Apple II 3—22558
high resolution turtle graphics 3—15380
Hitachi peach microcomputer, description and evaluation 3—198
Hockey, computer game review 3—7267
home computer for professional appls., language options 3—19436
home computer insurance 3—22579
home computer selection criteria 3—11161
home computers, impact on members of family, market development 3—19442
home computers, reasons for not purchasing 3—22621
home computers, robot arm accessory assembling 3—7256
home computers, suitability for business appls. 3—19343
home control interface for C1P 3—15293
home control system touch tone keypad 3—19399
home energy calculator in BASIC 3—15378
home energy control devices 3—7263
Home Finance Program for the IBM PC 3—19348
home finances program in BASIC 3—7260
home library, file management program, in IBM personal computer BASIC 3—11155
home robots, feasibility 3—5038
home use of services 3—14595
Hopper, computer game 3—22595
horizontal scrolling calling routine for Commodore PET/CBM in BASIC 3—7299
horror story plot generation by computer program 3—15339
horse race track, BASIC program for VIC or Atari 3—15386
hot rolling loads evaluation, Romilda program 3—22499
household finance program 3—19381
HP 75C personal computer review *(German)* 3—5579
HP-75 C portable computer, test *(German)* 3—7486
Human Errors user oriented error message program 3—22576
IBM 6580 personal office computer, test *(German)* 3—7485
IBM compatible systems 3—179
IBM PC as a music synthesizer, software requirements 3—11122
IBM PC character generator 3—19373
IBM PC use, book 3—15431
IBM PC-Mate Speech Master synthesizer board review 3—13793
IBM personal computer, full charact. set display on Epson printer 3—21637
IBM Personal Computer, programming for data communications 3—13516
IBM Personal Computer 3—1921
IBM Personal Computer *(German)* 3—13426
IBM Personal Computer and DEC Rainbow review 3—5559
IBM personal computer review 3—9483
IBM Selectric as an OSI system printer 3—3356
ICL Personal Computer review 3—9484
income tax returns calculation program in Applesoft BASIC *(German)* 3—15361
index sequential file data append in BASIC-4 *(German)* 3—6006
information society development 3—14338
INPUT command emulation, for Apple EXEC files, BASIC listing 3—19413
instructional computers, review of available products *(German)* 3—11061
Intel 2817 E^2PROM uses 3—19393
intellectual work aids, book 3—11180
interfacing a printer to a Z-80 PI/O chip 3—22614
interfacing with the BSR X-10 Home Control System 3—13535
interrupts and CP/M 3—21670
investment, inflation effects use of VisiCalc program 3—6478
investment future value program in BASIC 3—3384
Japanese personal computers, recent trends and product survey 3—17586
joysticks for Atari, right to left-handed conversion 3—15417
JR-100 beginners' computer BASIC programming, games appl. *(Japanese)* 3—9505
juggler game program in BASIC 3—15375
Jupiter Ace, FORTH language appls. and evaluation 3—7493

personal computing continued
Jupiter Ace personal computer for the engineer 3—9455
K-razy Shootout, arcade-type game for Atari 400/800 3—15345
Kaypro II, portable microcomputer, Pentagon office work appl. 3—10325
Kaypro II, portable microcomputer, software adaption from Superbrain 3—9259
Kaypro II portable microcomputer, evaluation 3—7488
keyboard buffer demonstration, BASIC program for PET 3—7274
kitchen applications of microprocessor control 3—7278
knowledge-based expert systems using networks of personal computers, future prospects 3—5778
Komtek-1 inexpensive microcomputer *(German)* 3—17606
KWIKDRAW, machine-code shape-table graphics, for TRS-80, BASIC loader 3—18110
La Trobe Talking communicator, personal computer for physically handicapped speechless school children 3—19454
label printing program in Basic 3—19439
language teaching software review 3—15255
Laser Barrage, game program in BASIC 3—3417
Lemmings' arcade-type game for disk Apple II, evaluation 3—15343
letter and number learning, BASIC programs for PET, VIC, Apple and Atari 3—19293
library management, database program 3—6272
line deletion program in BASIC 3—3405
linked lists in graphics 3—19371
Lisa personal computer, review 3—21060
LLIST dump reformatting, BASIC program for IBM PC 3—15351
local area network, PLAN 4000 system for personal computers 3—13618
Logo implementation in Microsoft Basic 3—22624
low cost voice reproduction in machine code 3—13791
LVL dual disc drives for the BBC microcomputer 3—13787
Lynx home computer 3—21096
machine code and better Basic, book 3—7311
machine code disassembler D80 for CP/M 3—2389
machine code tutorial for Commodore machines 3—9823
machine language programming for home computers 3—2223
Maggots, arcade game, BASIC program for Dragon 3—22617
management information systems, personal computing growth 3—14273
market for microcomputers, assessment 3—11277
market potential for personal computers in the eighties 3—15445
market projection program for the Color Computer in BASIC 3—2714
Marketplace, telecomputing game in BASIC and machine language, for TRS-80 Model IIIs 3—3361
mass audience information services in US 3—14618
mass line deletion utility, for Atari BASIC 3—19420
Master Blaster game program in Applesoft BASIC 3—15331
mathematics action games for TI, software review 3—19292
mathematics problem solver 'tool-kit', description 3—6641
MathMan, home multiplication learning game, in BASIC 3—3307
Mattel Aquarius home computer review 3—11410
maze construction program in Microsoft BASIC *(German)* 3—11117
maze game, program listing 3—22596
maze games, in FORTH for Jupiter Ace 3—22618
maze generation, three-dimens., microsoft BASIC subroutine 3—15391
Mazogs, single-player treasure/maze game for Sinclair/Timex, review 3—15396
MC 68000 overview 3—11095
measurement of a 35 mm focal plane shutter in Atari BASIC 3—19334
mechanical engineering, spreadsheet programs on personal computers, appl. 3—22452
medical-emergency databases for personal computer users 3—14778
memory testing computer programs in BASIC 3—15369
menu program, BASIC listing for Atari discs 3—19414
menu program, in BASIC, for Commodore disc-based micros 3—19412
Meteor Storm, space flight game, in BASIC 3—3413
Meteorites, games program, in Sinclair machine language 3—3425
metric conversions, computer program 3—7255
MFP-II, Apple-like programming, machine evaluation 3—7494
Micro-Simplex accounting package 3—10400
microcomputer control of solar energy water heating system for the home 3—7277
microcomputer control program in assembly language *(German)* 3—3447
microcomputer design of transistor amplifiers in BASIC 3—19053
microcomputer development and business applications 3—2567
microcomputer expansion, accessory evaluation 3—11402
microcomputer graphics primer 3—7252
microcomputer interfaces 3—22604
microcomputer manufacture, UK industry trends 3—11288
microcomputer market, assessment of prospects 3—19513
microcomputer market, current status 3—15526
microcomputer operating systems, functions and characts. *(German)* 3—10134
microcomputer parallel processing between user and computer 3—11142
microcomputer software digest 3—19394
microcomputers, introduction, book 3—1945
microcomputers, Norwegian market survey *(Norwegian)* 3—7344
microcomputers, operating systems, software industry effects 3—11213
microcomputers and microprocessor systems, hardware and software techniques, book 3—1673
microcomputers personal computers, floppy discs, characts. 3—19324
microwave engineer, desktop computer applic. 3—10791
miniature traffic lights controlled by Junior Computer, program 3—19164
Minotaur, Vic-20 computer game in Basic 3—22608
MINUETZ, musical variations prod., BASIC listing for Spectrum 3—22616
model rocket simulation in BASIC 3—19332
modem characteristics 3—7262
modem gaining 3—22561
modular database disk-based Apple BASIC program 3—15348
money changing/adding, educational program, in BASIC 3—15392
monitor, machine-code, for Sinclair ZX-81 3—21682
monitor for SuperPET, addition and relocation 3—19426
monitor for the Color Computer 3—11096
Monte Carlo methods, microcomputer appl., integral soln. 3—260
Morrow Designs M26 hard disk system review 3—13357
mortgage amortization program for the Atari in Basic 3—15358
moving graphics with colour overlay on the BBC microcomputer 3—21526
MP/MII, multiuser multiprogramming version of CP/M operating system 3—21667
Muehle board game, final stages, Pascal program *(German)* 3—3363
Multi 16 personal computer software *(Japanese)* 3—3442

personal computing continued
multi-personal computer system, optimistic concurrency control and recovery 3—10130
multiplication drills, BASIC program for Sinclair ZX81 3—22515
Munchkin Attack, Atari game program in BASIC 3—15325
museum exhibit for children's training 3—3495
music editor program for IBM personal computer 3—15303
music playback program, Rotberg Synthesizer 3—11127
music synthesiser/light show game program in Atari BASIC 3—19396
musical harmony prod., BASIC programs for VIC-20 3—22619
musical scales generating program, BASIC listing for VIC-20 3—19410
MX-80 graphics from Pascal 3—19372
N5200 Model 05 Personal Computer for business use, development and functions 3—1934
NAMADD, file creation routine for BASIC name-and-address program 3—11176
Nancomp microcomputer PIA devices 3—5671
NAND gate circuit layout design using personal computer *(German)* 3—17342
NASCOM computer, Teleprinter appl. as printer, interface software 3—10087
NASCOM FIND program in modified INLIN 3—15363
national computer conf. Houston, TX, USA (June 1982) 3—17399
NorthStar conversion program for DOS 5.2, in machine code 3—3381
Number Shuffle on the Atari 3—11102
numeric input, machine language programming for CBM micros 3—19422
nutrition and menu planning programs review 3—15340
office automation, DEC equipment launch 3—6362
office automation role 3—18435
OFFLOAD: an office workstation in a portable software environment 3—18451
Olivetti M20 16-bit microcomputer review 3—11425
operating systems, CP/M-86 rel. to MS-DOS 3—21698
Operation: Sabotage game program in BASIC 3—15323
orchestra 85 Composer's Edition & Orchestra 90, music packages for the TRS-80 3—11126
Oric-1, comparison with Sinclair Spectrum 3—19672
Orion, 16-bit micro, user assessment 3—19681
Osborne 1 computer use, book 3—15432
Osborne 1 evaluation 3—195
Osborne portable computer, machine and market 3—19344
OSI, memory-mapped graphics 3—15405
OSI C1P enhanced video modification 3—13422
PABX Centennial II, interactive data generator 3—15084
paddle controls for the TRS-80 Color Computer 3—7271
Pagoda puzzle program in assembly language 3—11100
Paint, Atari art program review 3—3338
Paint, graphics package for the Atari 3—22583
parallel printer interface circuit and program in machine code 3—3355
PASCAL, introduction for hobbyist 3—11151
PASCAL 80 3—15337
PASCAL program subroutine techniques 3—18188
pattern generation and manipulation, BASIC program for PET 3—19433
pattern generation program, using Skip and Divide algorithm 3—3444
pattern manipulation game for the ZX-81 3—22598
PDS assembly language development system 3—2391
PEEK and POKE explained 3—15364
personal computer market, future trends 3—22577
personal finance software for the Apple 3—7259
Pet character set examination program in BASIC 3—19379
PET index, book 3—7310
PET interfacing tutorial 3—5629
PET Monopoly in BASIC 3—11175
PET users cassette magazine, CURSOR, review of issues 23-28 3—3309
PET video, superimposition of TV pictures 3—3345
PET/CBM Standard Terminal Communications Package review 3—15383
Pie Writer word processor for Apple 3—15424
planetary motion simulation, BBC BASIC program 3—11154
Player ZX81 a tune-playing program for the Sinclair/Timex 3—15382
plotting graphic functions, using programmable pocket calculation, programs *(Spanish)* 3—2329
plotting program, educational, for VIC-20 BASIC 3—15410
Pokey Player, music editing/playing utility for Atari 400/800 3—22573
Pokey Player, music playing utility for Atari microcomputers 3—10081
Pokey Player II music editing, playing utility in BASIC 3—15324
portable computers, care and appl. on holiday 3—22578
portable computers, handheld and book-sized, market developments 3—15422
portable computers, market leaders, survey 3—7496
portable computers, market survey 3—11177
Positron 9000, 6809-based micro, bench test 3—19678
Poster Maker IBM PC program in BASIC 3—19347
precursors of personal computing, historical review 3—19340
preschool letter recognition, program in BASIC 3—11165
present state and future development of personal computers 3—19325
print control for Apple printers, machine language subroutine 3—22554
PRINT-USING keyword, simulation from Applesoft BASIC, machine language routine 3—21502
printed OSI directories, diskette ID inclusion 3—21501
professional workstations, comparison of Obis 1, Data General, Axxa, Xerox and Wang 3—6365
Professor Folibus' house, game program, in BASIC *(French)* 3—3344
program compressor program in machine code 3—15292
program generators, in BASIC, software review 3—21354
program linkage by coroutines—Forth to BASIC 3—21616
program routines for common tasks in BASIC 3—19376
programmable calculator, simultaneous plotting of diverse functions *(Spanish)* 3—13967
programmable character generator for OSI 3—15295
programming a TRS-80 to play Craps 3—15338
programming problems for the beginner 3—17983
Quickcode, program generator package for dBASE II 3—21725
Quickplot, plotting subroutine, PET machine language, BASIC loader 3—19424
Radio Shack's Compiler BASIC software review 3—7264
Radio Shack Pocket Computer maze program in BASIC 3—11146
radioteletype tone generation, BASIC program for Atari 800 microcomputer 3—22381
RAID: an 8080 interactive emulator 3—2413
rapid loading system, used for TV games computer 3—3438
Raster Blaster, pinball video game, for Atari computer 3—3423

personal computing continued
- rebuilding game paddles and joysticks 3—19388
- Red Alert, games program, in Sinclair machine language 3—3425
- relative disk files, read and writing on Commodore 3—21503
- relocating loader in Forth 3—3365
- renumbering BASIC programs on an OSI 3—17978
- Reverse Polish calculator simulation, BASIC program *(French)* 3—19327
- Ringquest, BASIC adventure game for Apple II and 48k RAM 3—3362
- ripple sort of data in fields, BASIC program 3—2306
- Rubik's cube program for SWTP 6800 and Apple II in BASIC 3—3396
- Rubik's cube simulation and solution, BASIC program *(French)* 3—19328
- Rubik's Cube soln. and simulation, Atari BASIC program 3—11157
- Rubik's Cube Unlocked, program review 3—11132
- Rubik Cube solution program, in BASIC 3—3414
- Rubik Cube solution program for the Heath computer 3—7279
- S-100 microcomputer troubleshooting 3—17607
- Sanyo 4050 16-bit micro, user evaluation 3—19680
- SAVEing cassette data to floppy disk 3—21516
- savings spreadsheet, IRA analysis 3—19389
- school administration, BASIC program for 48 K Apple 3—10375
- screen character design program, PIXELATOR, for VIC-20 in BASIC 3—3426
- screen display readability 3—11141
- screen editor for the OSI 65D assembler 3—3354
- screen editor IBM program in BASIC 3—14055
- screen editor selection criteria 3—7304
- Screen Writer display programming program in BASIC 3—7303
- screen-oriented editor for Atari Forth 3—19338
- Script and Crayon programs for TRS 80 3—19352
- scrolling program in VIC BASIC 3—15408
- Sea Battle game, realisation on Setun-70 minicomputer *(Russian)* 3—19435
- search utility, BASIC-loaded, for VIC 3—15399
- self-starting subroutine, for PET BASIC programs on disc in BASIC 3—3428
- Sensible Speller software review 3—6407
- Shamus, machine-code adventure/arcade game for Atari 3—15398
- shape generator for the Commodore 64 in BASIC 3—7291
- shape handling utility for Apple, in BASIC 3—3370
- share portfolio management program for ZX81, in BASIC *(French)* 3—21858
- Sharp MZ-80A, personal computer, description and evaluation 3—3657
- Sharp MZ-80A microcomputer, benchtest 3—200
- Sharp MZ-80A personal computer, test results *(German)* 3—5566
- Sharp PC-1500, four colour plotter facility *(German)* 3—9739
- shellsort and quicksort techniques 3—9917
- Shoot, computer game review 3—7269
- short-wave broadcasting of microcomputer programs *(Spanish)* 3—3441
- simulation games, educational appls. 3—3308
- Sinclair Spectrum, comparison with Oric-1 3—19672
- Sinclair ZX81, parallel interface to Heath H8 3—9549
- Sinclair ZX Spectrum, colour graphics microcomputer, benchtest 3—201
- Sinclair ZX Spectrum, comparison with BBC micro 3—205
- Sinclair ZX Spectrum, description 3—184
- single board microcomputer input port modification 3—3390
- sixteen-bit microcomputers, buyers guide to system specifications 3—19679
- skiing game, Slalom, in BASIC for Atari or PET 3—15390
- SMAKY, an evolving family of personal computers for office automation 3—2592
- small area networks, I^2C bus and D^2B bus from NV Philips 3—5712
- small business and personal computers compared 3—3667
- Small-C compiler, v.2 3—21615
- Small-VOS and Small-Tools 3—14099
- Smith-Corona TP-I daisywheel printer, description and user test 3—183
- software, integrated systems for personal computers 3—14312
- software broadcasting on FM radio, pilot scheme 3—3412
- software development on personal computers 3—19443
- software handbooks review 3—7268
- software sales, vertical marketing 3—11214
- software trends 3—7261
